Preface

This report provides a detailed statistical profile of adult offenders in the Kansas correctional system and describes the State's offender commitment and release trends. As in previous years, the report is based on data obtained through an on-line computerized offender information system. Information is collected systematically during the entire period offenders are in the custody or control of the Secretary of Corrections. The number of offenders for whom information is available varies across data items reported. Percentages reported are based upon the number of individuals for whom data are available, and not necessarily upon the total population.

In accordance with Kansas Senate Bill 748, effective May 24, 1990, several correctional facilities were consolidated and/or renamed. Subsequent administrative actions taken by the Department of Corrections in August 1990 and in June 1991 resulted in further facility

consolidation. The newer facilities, El Dorado Correctional Facility (Central Unit) and Larned Correctional Mental Health Facility, opened in June 1991 and January 1992, respectively. On September 1, 1996, Wichita Work Release Facility became a unit of Winfield Correctional Facility. A number of housing units and placement options were closed during FY 2009 because of budget constrictions: At Lansing Correctional Facility (South Unit at Osawatomie); at El Dorado Correctional Facility (East Unit at Toronto and North Unit at El Dorado); at Norton Correctional Facility (East Unit at Stockton); and Labette CCC).

Table A lists current facilities and unit designations along with prior names and designations. In addition to the facilities listed, inmates were also housed at Larned State Hospital (LSH) during FY 2009. Figure A is a Kansas map showing locations of the correctional facilities.

Table A

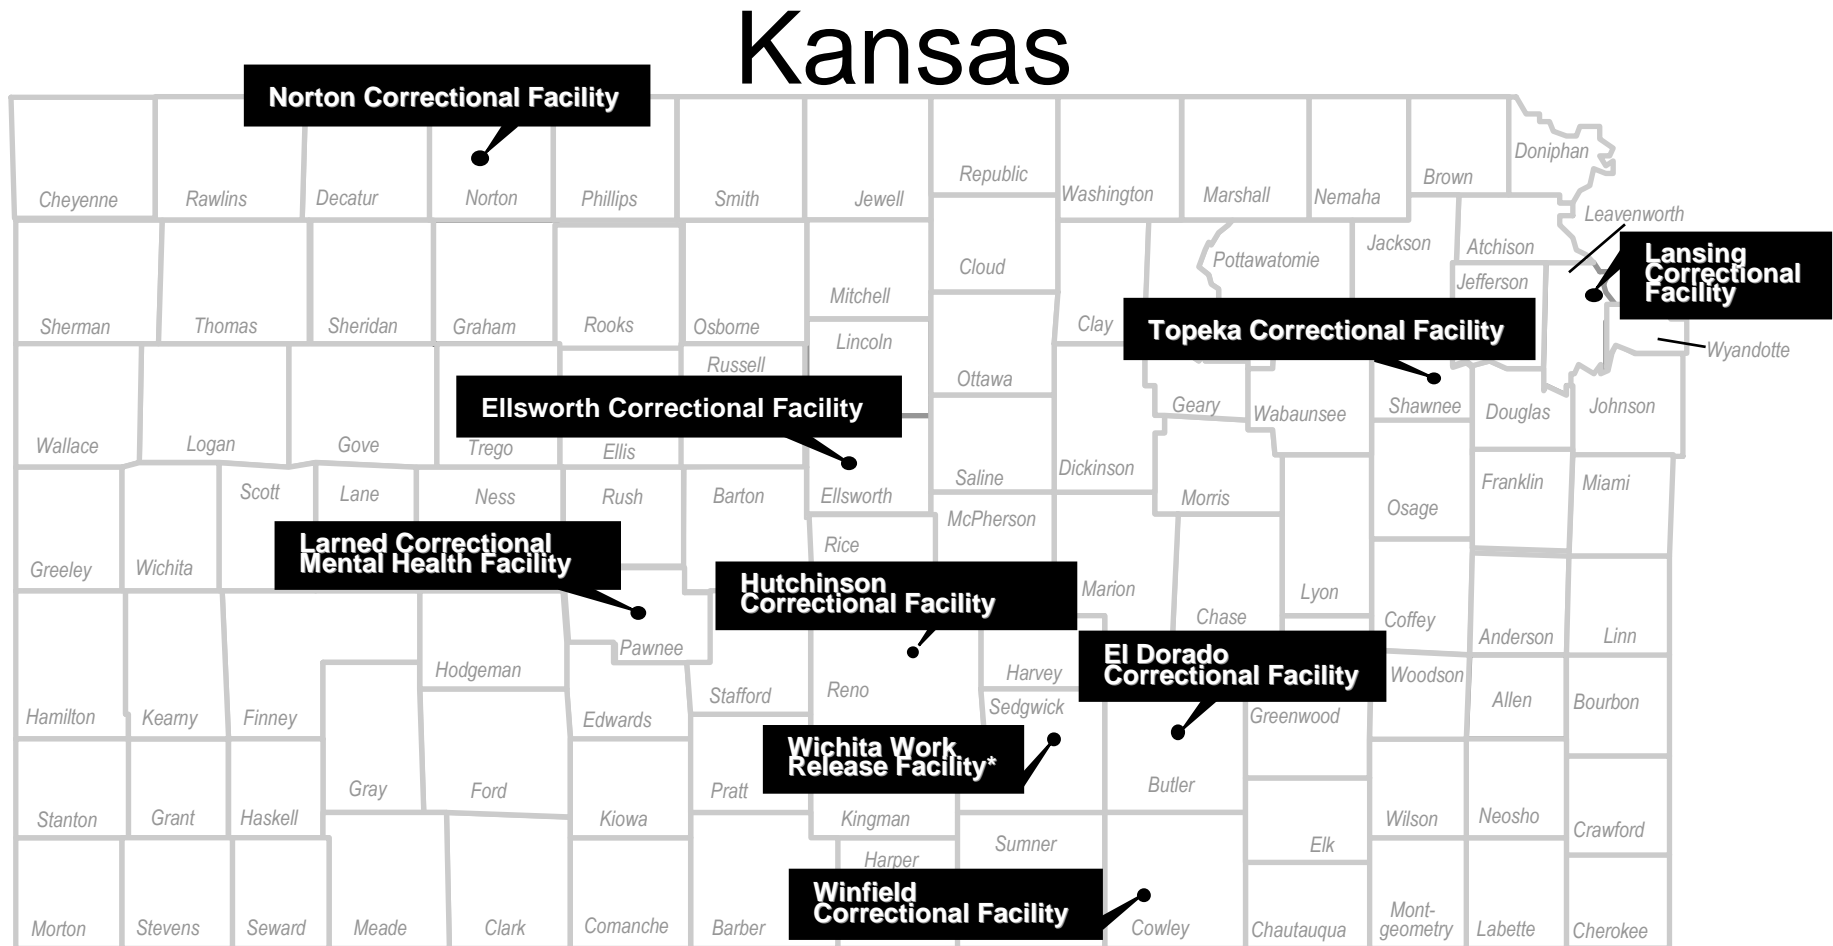

**Kansas Correctional Facility Names and Unit Designations
June 30, 2009**

<u>Facility Name/Unit Designation</u>	<u>Location</u>	<u>Former Name/Designation</u>
Lansing Correctional Facility (LCF)		
Central Unit	Lansing	Kansas State Penitentiary (KSP)
East Unit	Lansing	Kansas Correctional Institution at Lansing (KCIL)
South Unit (Osawatomie) closed in FY 2009	Osawatomie	Osawatomie Correctional Facility
Hutchinson Correctional Facility (HCF)		
Central Unit	Hutchinson	Kansas State Industrial Reformatory (KSIR)
East Unit	Hutchinson	Hutchinson Correctional Work Facility (HCWF)
South Unit	Hutchinson	KSIR - Minimum Unit
El Dorado Correctional Facility (EDCF)		
Central Unit	El Dorado	Central Unit opened as a new facility June 1991
East Unit (Toronto) closed in FY 2009	Toronto	Toronto Honor Camp
North Unit (at El Dorado) closed in FY 2009	El Dorado	El Dorado Correctional Work Facility (EDCWF) - El Dorado Honor Camp (EDHC) prior to that
Norton Correctional Facility (NCF)		
Central Unit	Norton	
East Unit (Stockton) closed in FY 2009	Stockton	
Ellsworth Correctional Facility (ECF)	Ellsworth	
Topeka Correctional Facility (TCF)		
Central Unit	Topeka	Kansas Correctional-Vocational Training Center (KCVTC) and Resource Work Unit (RWC)
Reception and Diagnostic Unit (RDU)	Topeka	State Reception and Diagnostic Center (SRDC) (TCF-RDU closed February, 2001; Male RDU to EDCF; Female RDU function to TCF I- cell house)
South Unit (Closed Sept., 1994)	Topeka	(Forbes Field) Forbes Correctional Facility (FCF)
West Unit	Topeka	(State Hosp. Grounds) Topeka Correctional Facility (TCF) - Topeka Pre-release Center prior to that
I-Cell House	Topeka	Opened as new female maximum security unit in May, 1995 (Female RDU component added 2001)
Winfield Correctional Facility (WCF)*	Winfield	Winfield Pre-release Center (WPRC)
*Wichita Work Release Facility (WWRF)	Wichita	Wichita Work Release Center (WWRC)
Larned Corr. Mental Health Facility (LCMHF)	Larned	Opened as a new facility January 1992

*On September 1, 1996, Winfield Correctional Facility and Wichita Work Release Facility were consolidated administratively under the direction of a single Warden.

Figure A

Correctional Facility Location: June 30, 2009*

vii

**A number of housing units and placement options were closed during FY 2009 because of budget constrictions: At Lansing Correctional Facility (South Unit at Osawatomie); at El Dorado Correctional Facility (East Unit at Toronto and North Unit at El Dorado); at Norton Correctional Facility (East Unit at Stockton); and Labette CCC.*

***Administratively this facility is under a "parent" institution (Wichita Work Release Facility under Winfield Correctional Facility).*

Introduction

The *Statistical Profile Report* provides information about offenders within the Kansas Correctional System. The report begins with Section 1 by graphically summarizing recent trends and focuses on population levels, commitment trends, and offender characteristics. Subsequent sections present more specific topics in greater detail. Section II compares inmate population and housing capacity levels and Section III describes admissions to and releases from KDOC custody. Section IV provides a description of offenders in prison on June 30, 2009, while Section V contains a summary of information on the post-incarceration supervision population. Each section begins with a summary

presentation and is followed by statistical tables and graphs.

The report focuses on comparing current information with prior years wherever possible. Nonetheless, much of the offense-related information is restricted to recent years because terms used for many years—for example, “felony class of offense” and “controlling minimum offense”—no longer apply to all offenders. Applicable to all offenders, including those sentenced under the Kansas Sentencing Guidelines Act of 1993, is the “most serious offense for the current incarceration.” This replaces “controlling minimum offense.” Also still applicable to all offenders is the “overall most serious offense.”

**Population Trends and
Offender Characteristics:**

Graphic Summary

SECTION I

Population Trends and Offender Characteristics: Graphic Summary

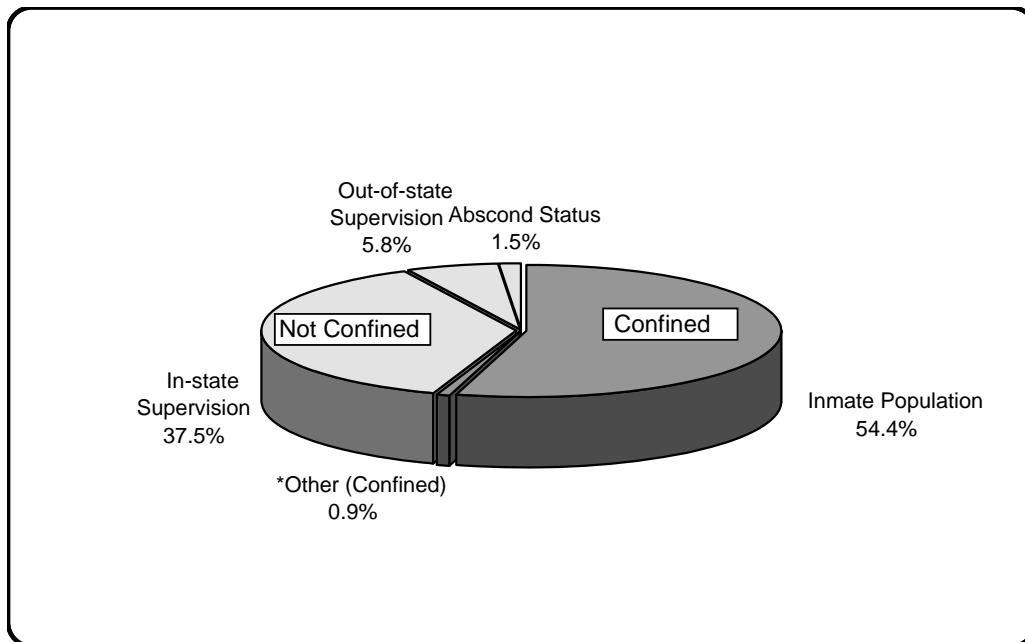

The graphic presentations in this section highlight recent trends and developments regarding inmate population levels, admissions and releases, and characteristics of the offender population.

[SEE Figures: 1 – 12 -- pages 2 - 13]

Figure 1

Offender Population Under Management of the Kansas
Department of Corrections: June 30, 2009

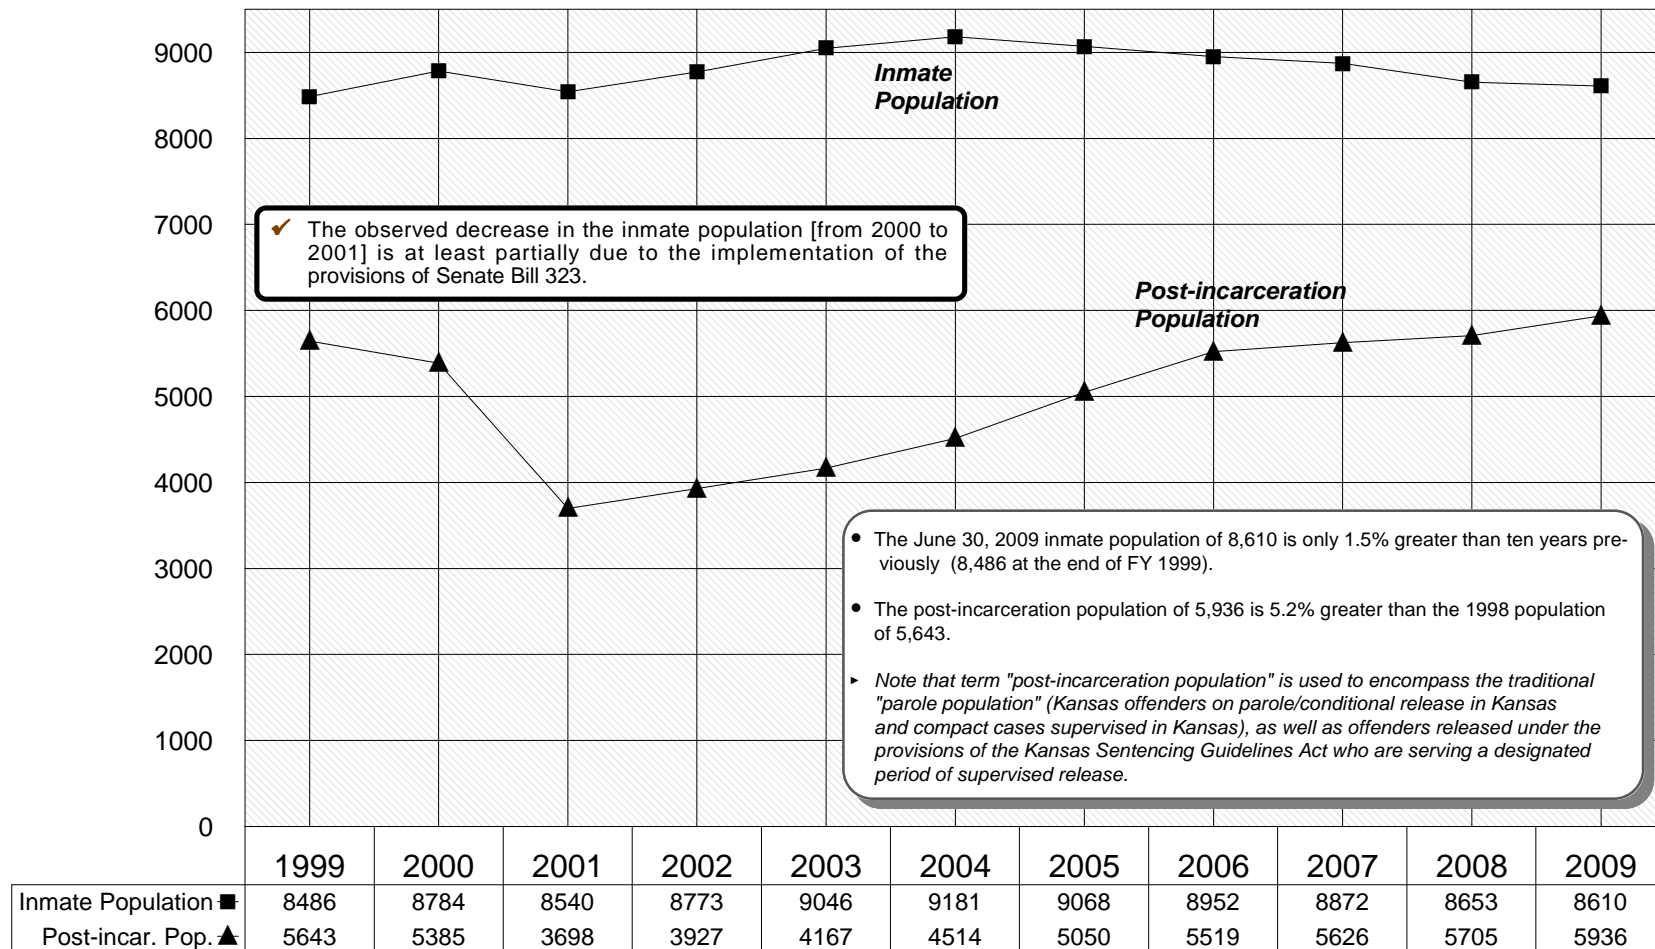

Status of Offenders	Number	Percent of Total
Offenders Confined:		
Inmate Population	8,610	54.4%
*Other (Confined)	136	0.9%
Subtotal	8,746	55.2%
Offenders Not Confined:		
In-state Supervision	5,936	37.5%
Out-of-state Supervision	911	5.8%
Abscond Status	239	1.5%
Subtotal	7,086	44.8%
Grand Total	15,832	100%

***Other" denotes those confined out-of-state (compacts and in absentia cases).*

Figure 2

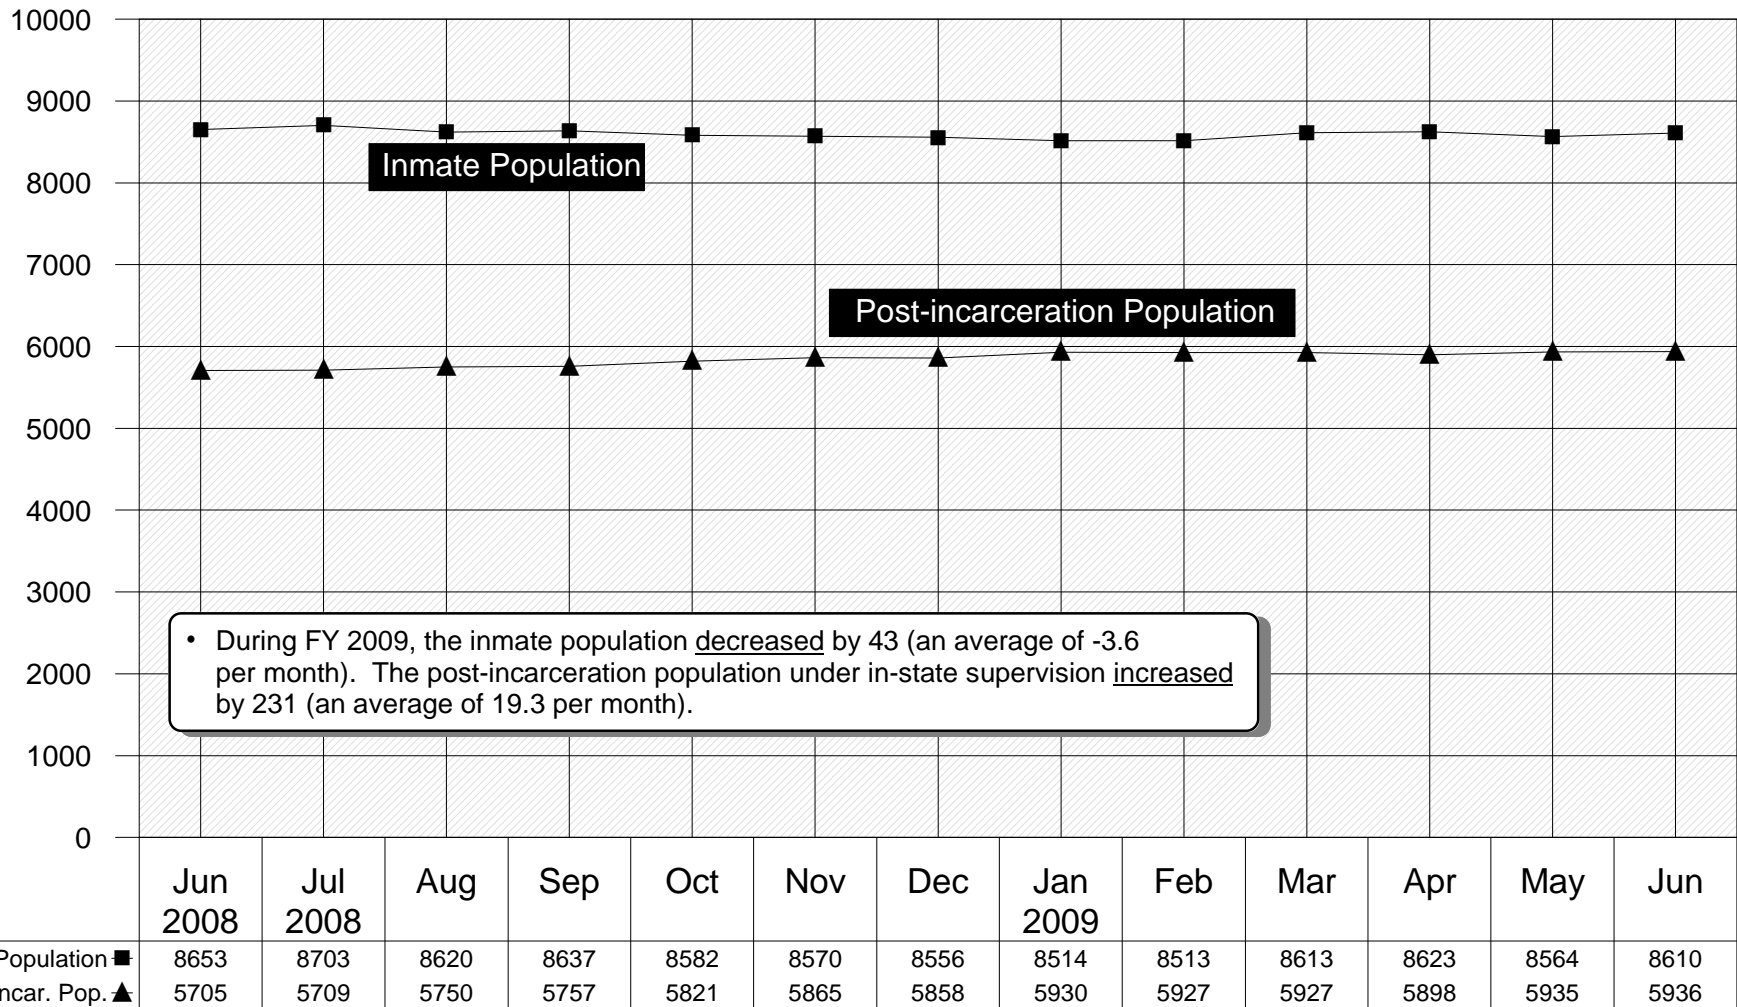

Inmate Population and Post-incarceration Population Under In-state Supervision: Fiscal Years 1999 - 2009*

Figure 6

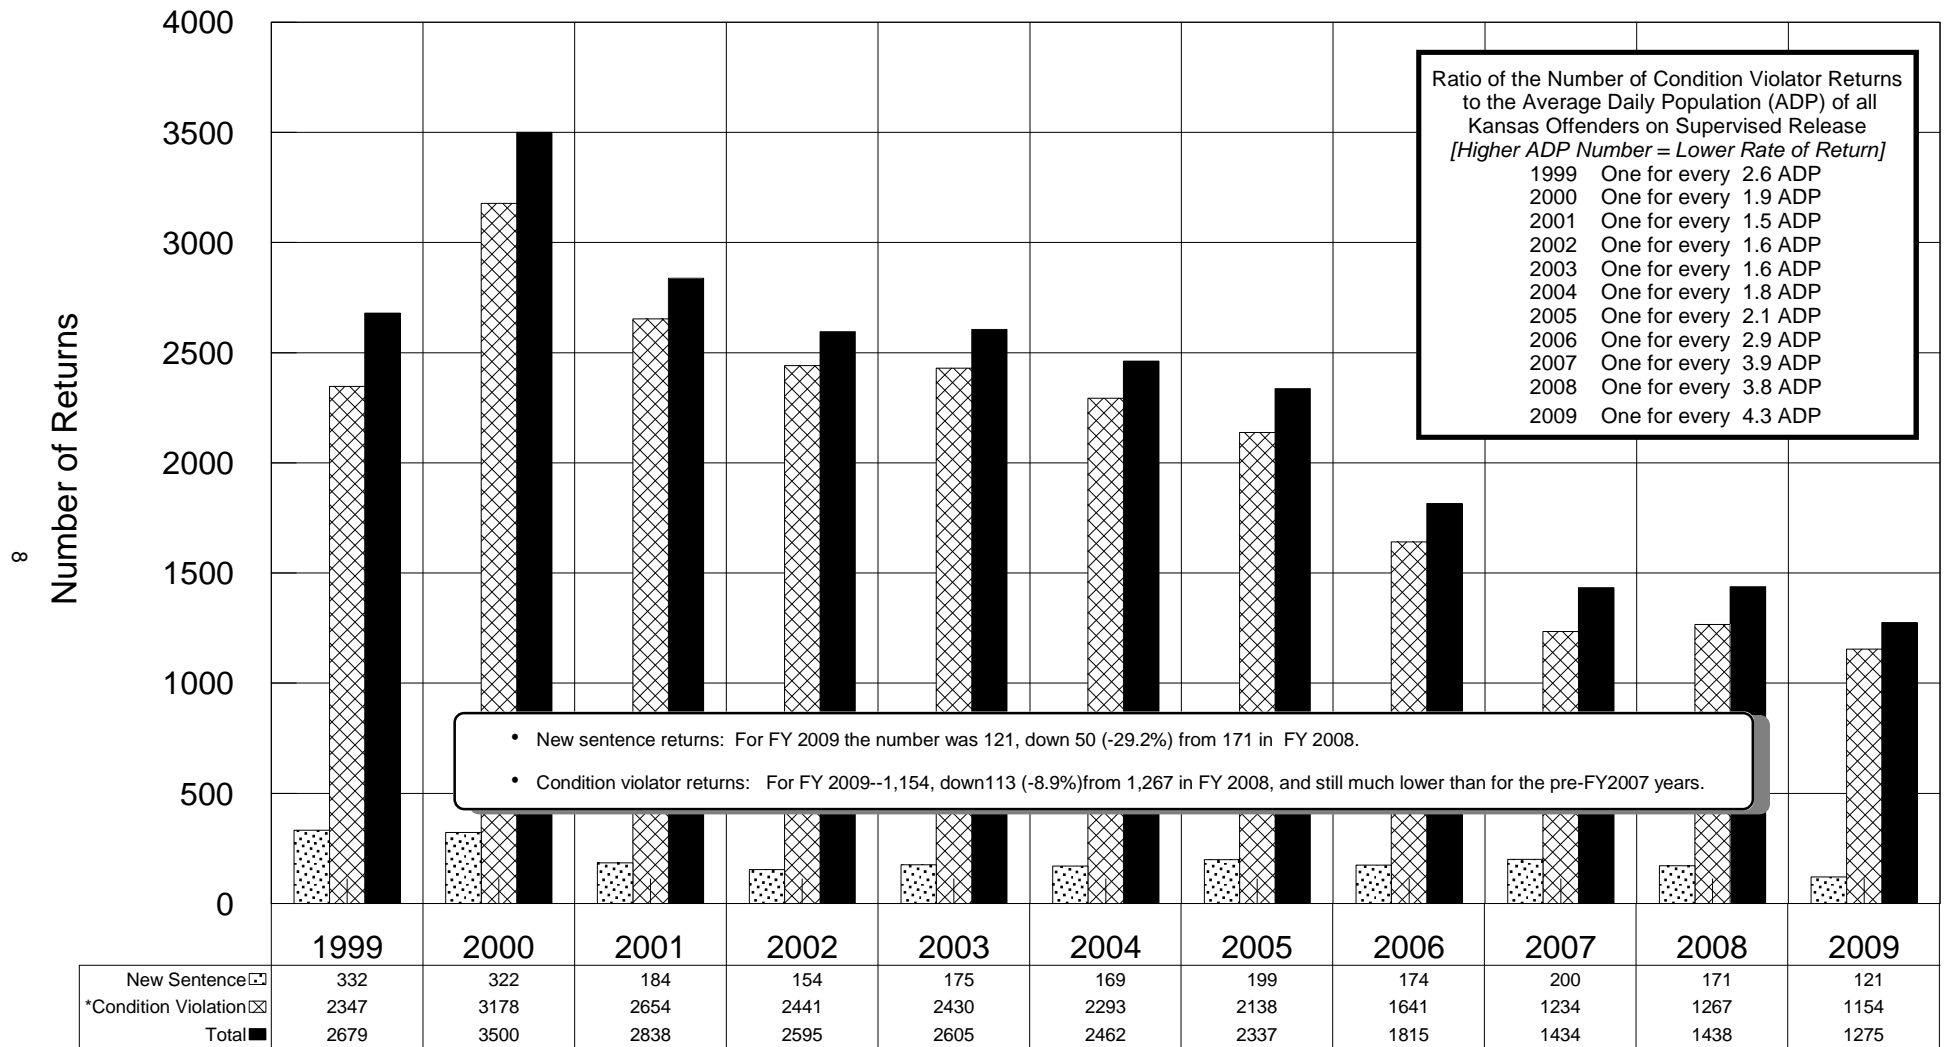

Parole Rate: Kansas Parole Board Decisions to Parole as a Proportion of Total Decisions, FY 1999 - 2009*

*Information pertains only to those cases that are still subject to release via the Kansas Parole Board (indeterminate or "old law" cases) and reflects decisions resulting from regular parole hearings. [The large majority of releases from prison are via the provisions of the Kansas Sentencing Guidelines Act of 1993 (determinate sentencing).]

HG98 Chart Fig6-SP2009.pr4

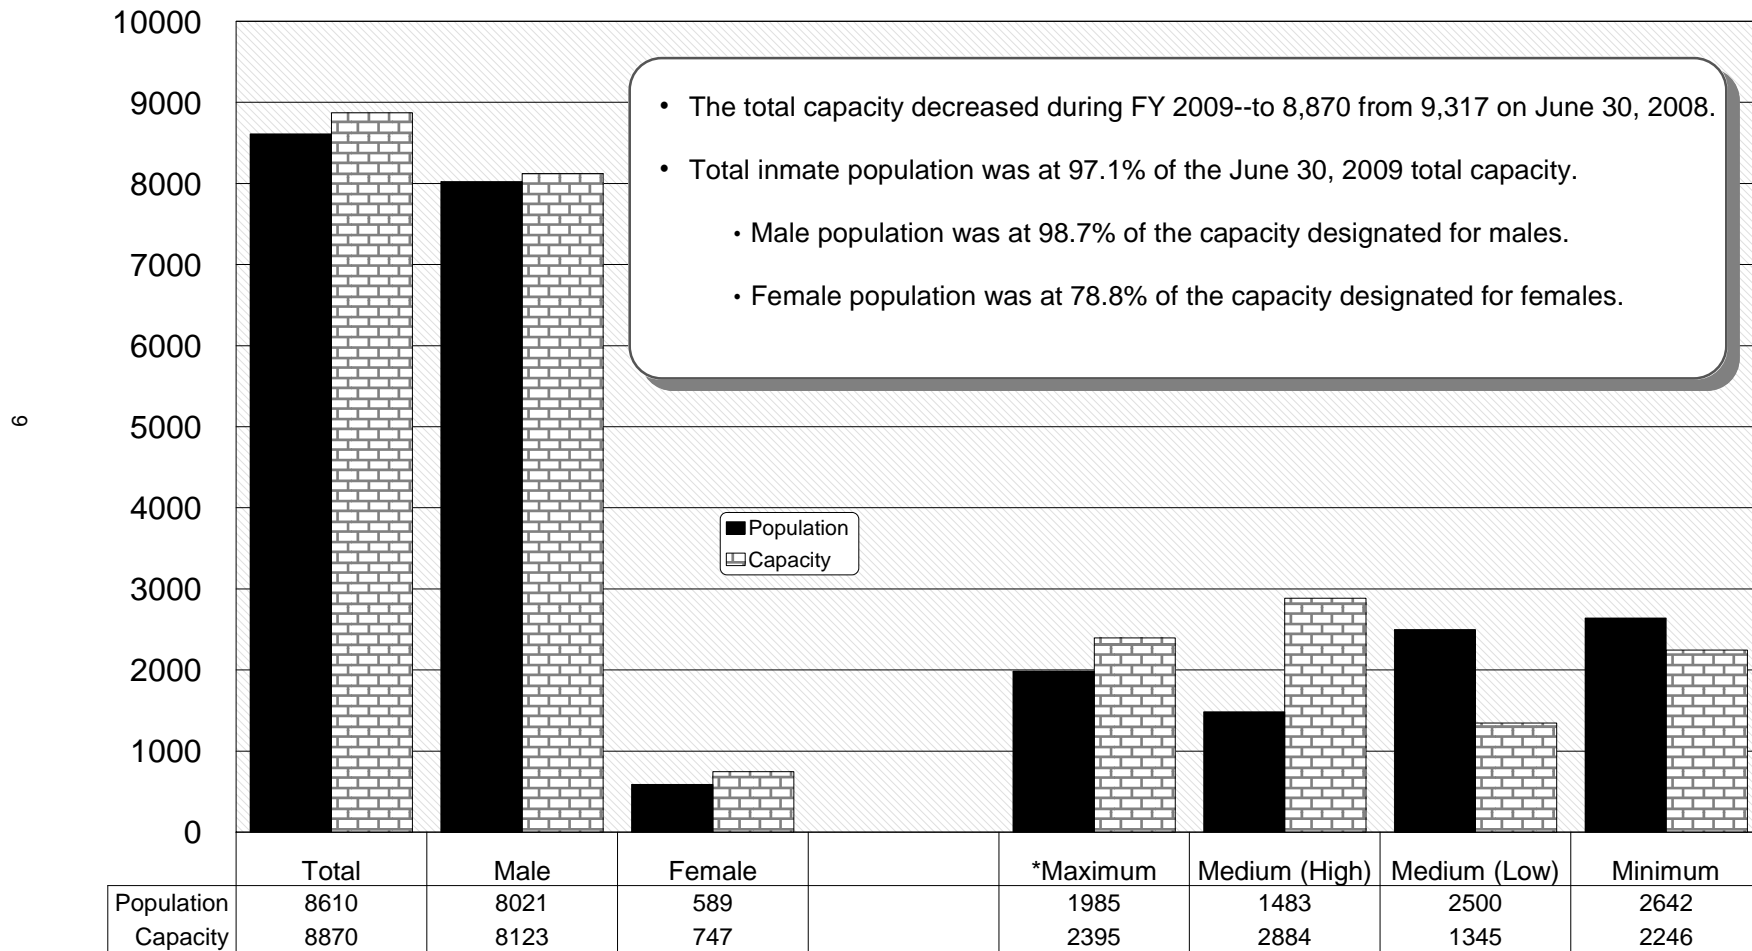

Figure 7
Yearly Return Admissions for Violation
While on Post-incarceration Status: FY 1999 - 2009

* Condition Violation" reflects the number of return admissions for violation of the conditions of release -- no new felony offense involved. "New Sentence" reflects the number of return admissions resulting from new felony convictions while on release status. Note that the "Condition Violation" category includes a significant number of cases in which the offender was officially returned with no new sentence, but actually had been convicted of a new felony offense, the date of offense for which was before the return to prison. Documentation for the new sentence did not become available until after the offender was admitted.

*Defined as the most serious active offense for which the inmate is serving.
Included are attempt, conspiracy, and solicitation to commit.

Kansas Department of Corrections

FY 2009 STATISTICAL PROFILE

Section II

**Offender Population Levels
and Institutional Capacity:**

Fiscal Year 2009

SECTION II

Fiscal Year 2009: Offender Population Levels and Institutional Capacity

Components of the System-wide Offender Population

- Total number of offenders under management is 15,832, a slight increase from 15,705 the previous year.
- Primary components of June 30, 2009 system population are as follows:
 - Offenders Confined. Inmates confined in Kansas correctional facilities numbered 8,610 or 54% of the system population. Additional offenders under management are 136 inmates serving in absentia or on compact status out-of-state.
 - Offenders Not Confined. In-state parole caseload-Kansas offenders on parole/conditional release or post-release supervision in Kansas and compact parole/probation cases supervised in Kansas numbered 5,936 or 37% of the system population. Additional offenders under management include 911 under out-of-state supervision and 239 on abscond status.

[SEE Figure 1: Offender Population Under Management of the Kansas Department of Corrections: June 30, 2009 -- page 2]

[SEE Table 1: Status and Physical Location of Offenders in the Correctional System: Comparison of June 30, 2008 and June 30, 2009 Populations -- page 17]

Inmate Population Trends

- Year-end inmate population and the average daily population for each of the last 10 years are presented graphically in Figure 13 – page 18.
- Month-end inmate population figures for FY 1999–FY 2009 are presented in Figure 14 – page 19.

The average monthly change in inmate population has fluctuated markedly over the past 10 years, with a downward trend the past four years.

Fiscal Year	Average Monthly Change
1999	37.3
2000	24.8
2001	-20.3
2002	19.4
2003	22.8
2004	11.3
2005	-9.4
2006	-9.7
2007	-6.7
2008	-18.3
2009	-3.6

[SEE Figure 13: *Total Inmate Population and Average Daily Population: Fiscal Years 1999–2009*- page 18; and

Figure 14: *End-of-month Inmate Population: Fiscal Years 1999 – 2009* -- page 19]

Current Inmate Population

- On June 30, 2009 the total inmate population was 8,610, a decrease of 43 (-0.5%) from June 30, 2008.
 - The number of inmates in facilities operated by the Department of Corrections was 8,499 and the population in contract placement was 111.
- The FY 2009 average daily population was 8,590, a decrease of 183 (-2.1%) from 8,773 in FY 2008.

Presented below is an update on offender population levels since June 30, 2009.

Date	Number of Offenders	
	Inmate Population	Post-incarceration Supervision (In-state) Caseload
June 30, 2009	8,610	5,936
July 31, 2009	8,586	5,967
August 31, 2009	8,626	5,999
September 30, 2009	8,635	5,980

- Total inmate population on September 30, 2009 was 8,635 – up slightly from 8,610 on June 30, 2009.
- In-state post-incarceration caseload on September 30, 2009 was 5,980 – up from 5,936 on June 30, 2009.

[SEE Table 2: Number of Inmates Confined and Average Daily Population, FY 2008 and FY 2009 -- page 20]

Capacity of Correctional Facilities

- The total capacity, including placements in non-KDOC facilities, was 8,870 as of June 30, 2009.
 - Of the total capacity, 747 beds were designated for female occupancy.
- The capacity for placement of inmates at non-DOC facilities was 121. This total includes beds at Larned State Hospital and at contract jail facilities. The beds at Labette Correctional Conservation Camp closed in FY 2009.

[SEE Table 3: Capacity of Correctional Facilities: June 30, 2009 by Gender and Unit -- page 21]

Table 1
Status and Physical Location of Offenders in the Correctional System:
Comparison of the June 30, 2008 and June 30, 2009 Populations

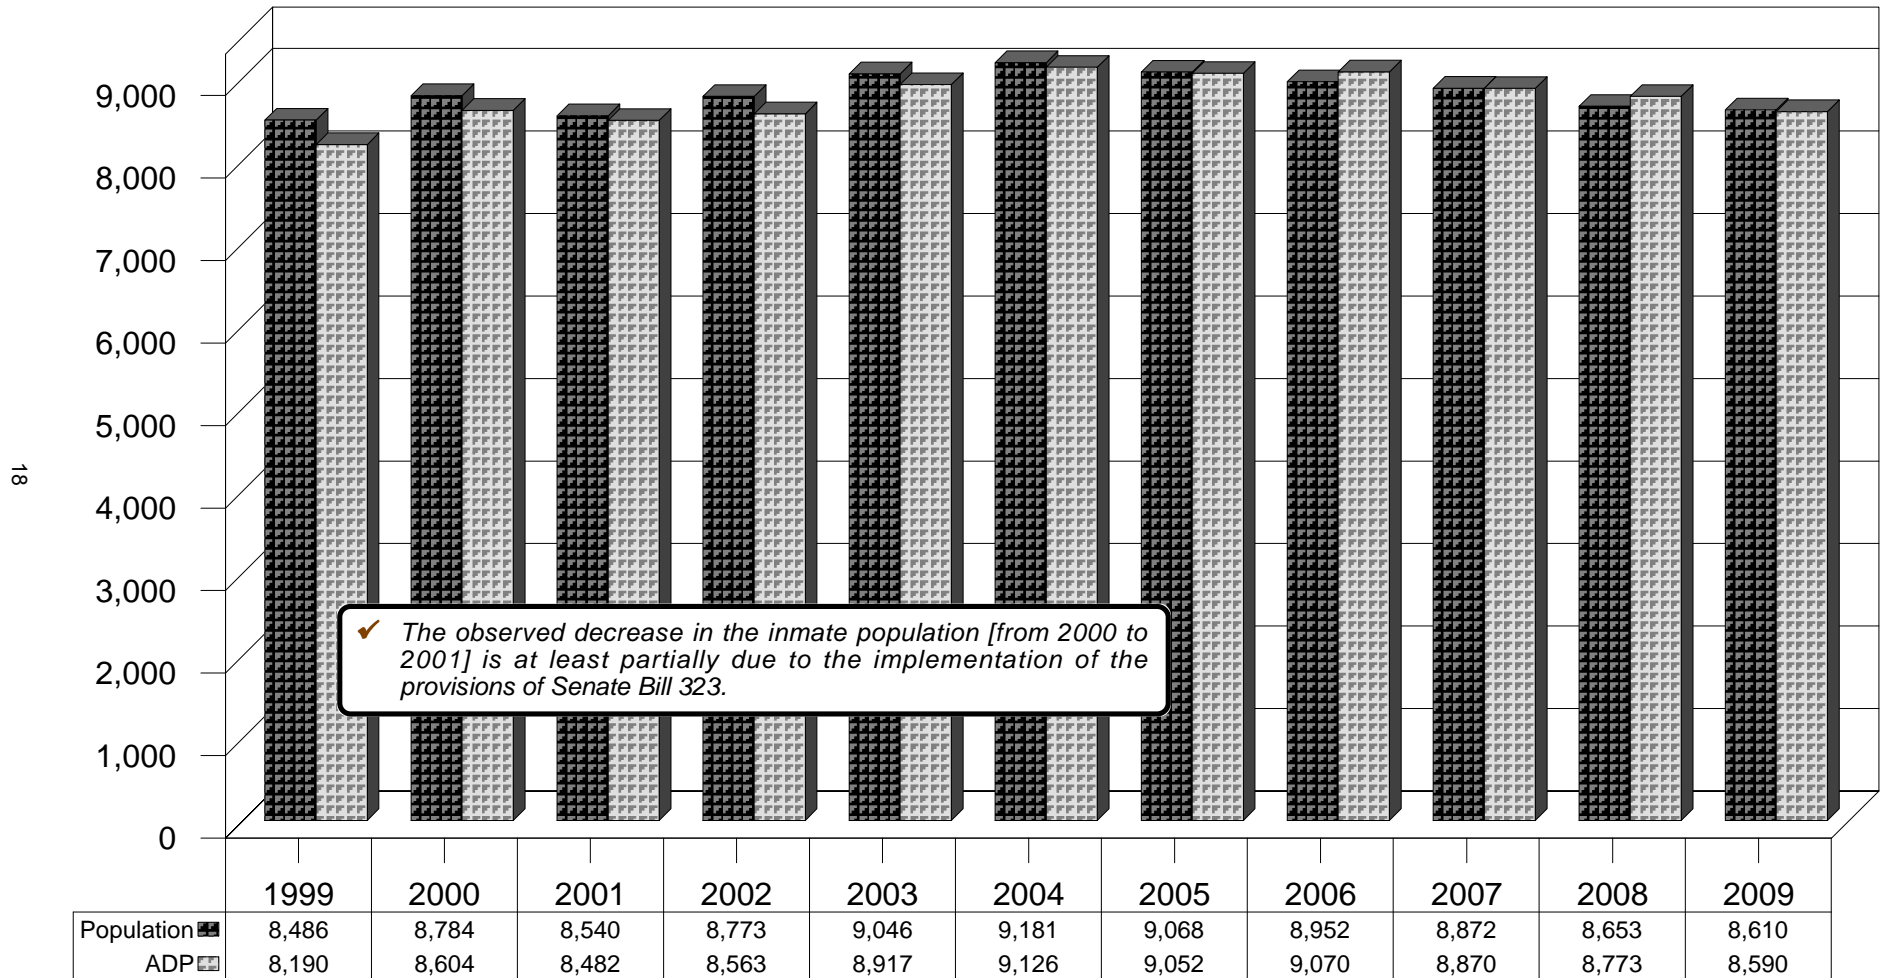

Status/Physical Location	Number of Offenders		Change	
	6/30/2008	6/30/2009	No.	%
Kansas Correctional Facilities:				
Intake Evaluation Complete	7,945	7,992	47	0.6%
Awaiting Intake Evaluation (or in progress)	482	417	-65	-13.5%
Interstate Compact Received	87	82	-5	-5.7%

Therapeutic Community				
Medical Leave	2	4	2	100.0%
Local Detention/Security Housing	2	4	2	100.0%
Regular Furlough	0	0	0	
Subtotal (Inmate Population)	8,653	8,610	-43	-0.5%
Kansas Post-incarceration Population:				
Kansas Cases	3,901	4,028	127	3.3%
Compact Parole	463	529	66	14.3%
Compact Probation	1,341	1,379	38	2.8%
Subtotal (Kansas Caseload)	5,705	5,936	231	4.0%
Offenders Under Administrative Supervision:				
Inmates:				
Interstate Compact Sent	67	74	7	10.4%
In absentia	59	62	3	5.1%
Subtotal (Inmates)	126	136	10	7.9%
Post-incarceration Status:				
Out-of-state Supervision	973	911	-62	-6.4%
Absconder with Warrant (In-state and Out-of-state)	248	239	-9	-3.6%
Subtotal (Post-incarceration)	1,221	1,150	-71	-5.8%

Note: Not included in this table are offenders who are out for court appearances, in local detention, and on escape status. This group numbered 145 on 6/30/2008 and 102 on 6/30/2009.

* Total under contract jail placement [those housed in local jails in Kansas].

Figure 13

Total Inmate Population and Average Daily Population (ADP): Fiscal Years 1999 - 2009*

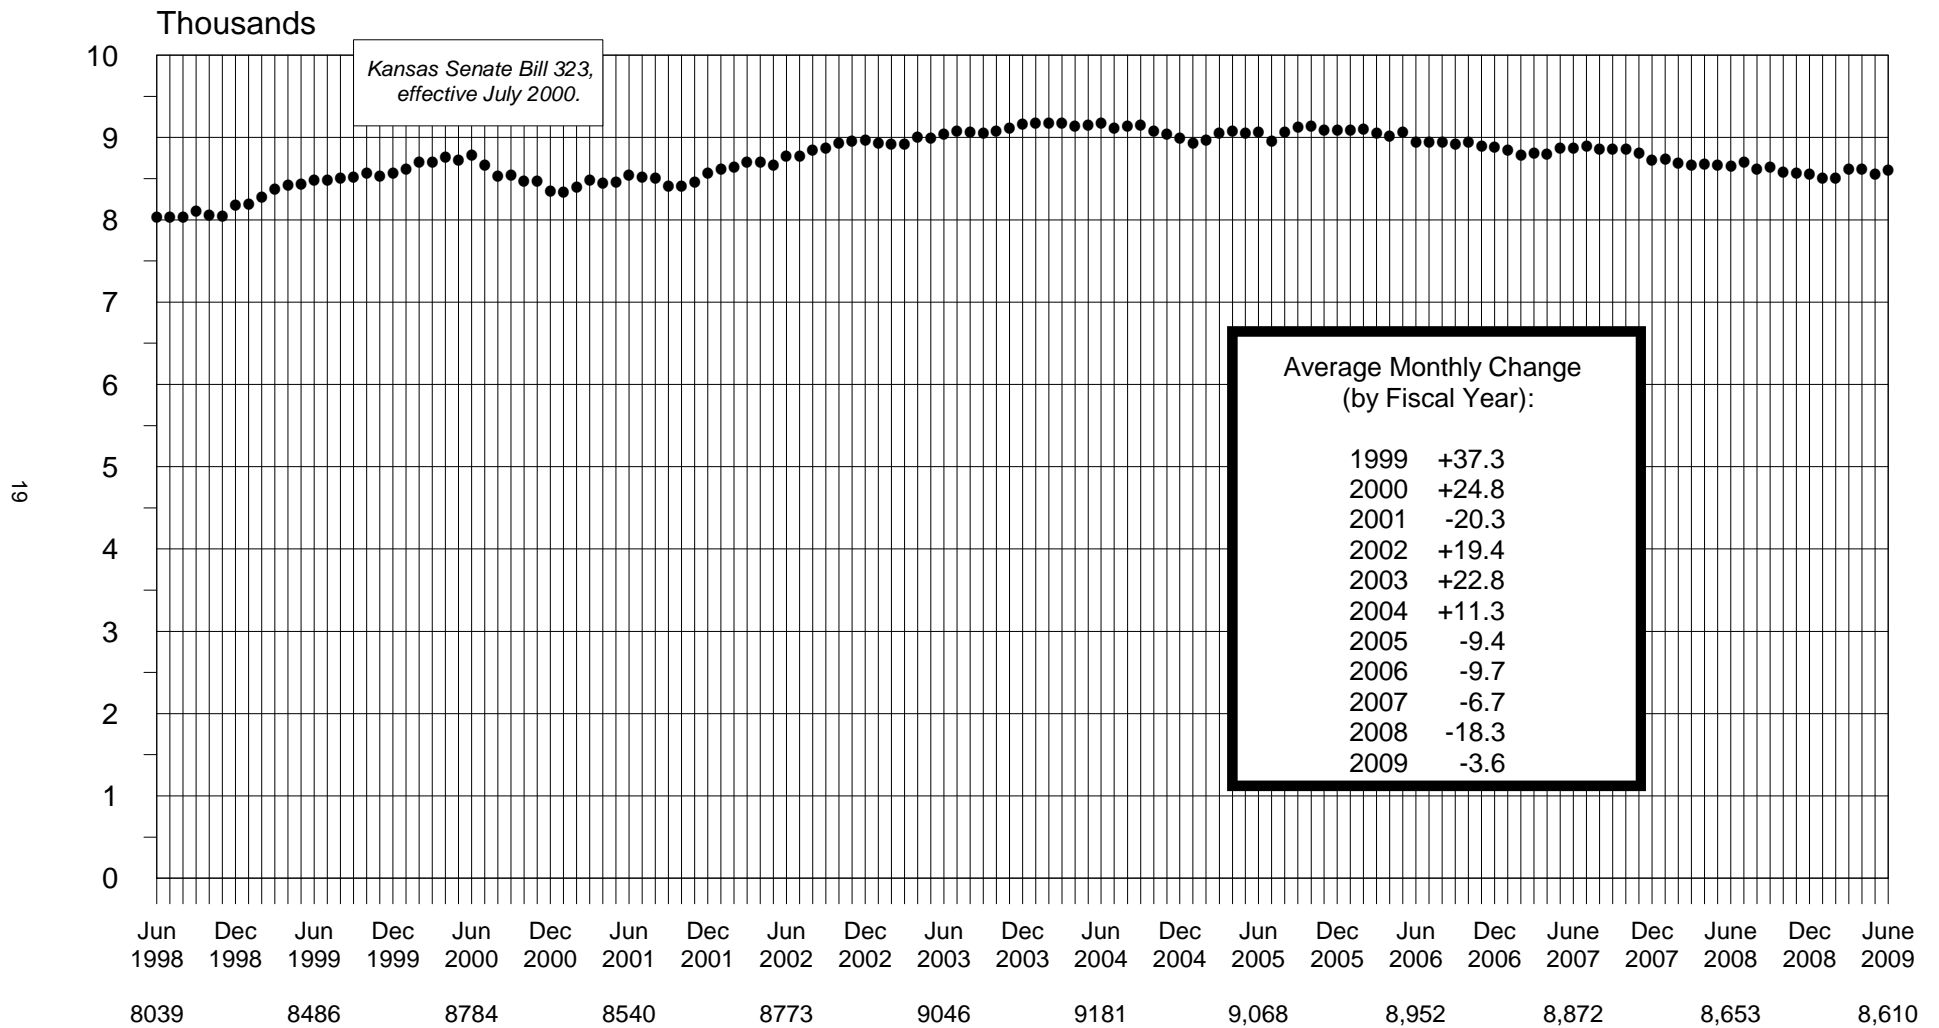

*"Population" reflects the number of inmates as of June 30 each year.

The average daily population ("ADP") is the average daily count for the year.

Kansas Department of Corrections

FY 2009 STATISTICAL PROFILE

Section III

Admissions and Releases:

Fiscal Year 2009

SECTION III

Fiscal Year 2009 Admissions and Releases

Information pertaining to admissions and releases of offenders during FY 2009 is summarized in this section. The basic data is presented in Tables 4 and 5. Detailed information on court-related admissions to the system is presented by type of offense and county of commitment. Also included as part of this section is information on two topics that are

central to the discussion of admissions and releases—rate of parole and offender recidivism. Unless otherwise noted, all admission and release information pertains to admission “events” and release “events” (figures include any multiple admissions and/or multiple releases of an offender).

Summary of Admission and Release Activities

- The number of admissions and releases for the past 10 years is presented graphically in Figures 15 and 16.
- FY 2009 admissions and releases:
 - Total number of admissions was 4,651 - down 155 (-3.2%) from 4,806 in FY 2008.
 - Total number of releases was 4,691 - down 338 (-6.7%) from 5,029 in FY 2008.
 - Probation Violator Admissions: Information on yearly admissions for probation violation is presented below by category. The number of probation violators (no new sentence) continues to account for over one-third of total admissions.

Fiscal Year	Probation Violation (no new sentence)		Probation Violation (new sentence)	
	Number	% of Total Admissions	Number	% of Total Admissions
1999	1,552	26.6	220	3.8
2000	1,394	21.4	202	3.1
2001	1,294	21.8	194	3.3
2002	1,454	23.8	221	3.6
2003	1,500	24.9	204	3.4
2004	1,709	28.8	146	2.5
2005	1,783	30.4	126	2.1
2006	2,031	35.8	139	2.4
2007	1,743	35.0	98	2.0
2008	1,615	33.6	156	3.2
2009	1,456	31.3	89	1.9

- **Return Admissions:** As shown in the table below, the two types of admission for violations while on post-incarceration supervision, new sentence and condition violation (no new sentence), together comprised 27.4% of total admissions in FY 2009 – down from 29.9% in FY 2008.
 - **New sentence returns:** For FY 1999 – FY 2000 this type of return admission was 5%-6% of total admissions each year. Since then it has been 3%-4%.
 - **Condition violator returns:** In FY 2009 condition violation admissions accounted for 25% of the total admissions, matching FY 2007 as the lowest figure for the 10-year period. It should be noted, however, that in the inmate population on hand at any given time, the proportion most recently admitted as condition violators is much smaller (8.8% on June 30, 2009).
 - Also note that a significant number of those officially admitted as condition violators (no new sentence) actually had new felony convictions, the court documentation for which was not received until after admission.

As shown below, the ratio of condition violation returns to the average daily population (ADP) of all Kansas offenders on supervised release indicates that the proportion of offenders that are returned has decreased in the past several years, especially FY 2009 [Higher Number = Lower Rate of Return]:

1999	One for every 2.6 ADP
2000	One for every 1.9 ADP
2001	One for every 1.5 ADP
2002	One for every 1.6 ADP
2003	One for every 1.6 ADP
2004	One for every 1.8 ADP
2005	One for every 2.1 ADP
2006	One for every 2.9 ADP
2007	One for every 3.9 ADP
2008	One for every 3.8 ADP
2009	One for every 4.3 ADP

Return Admissions for Violations While on Post-release Supervision

Fiscal Year	No New Sentence (Condition Violation)		New Sentence	
	Number	% of Total Admissions	Number	% of Total Admissions
1999	2,347	40	332	6
2000	3,178	49	322	5
2001	2,654	45	184	3
2002	2,441	40	154	3
2003	2,430	40	175	3
2004	2,293	39	169	3
2005	2,138	36	199	3
2006	1,641	29	174	3
2007	1,234	25	200	4
2008	1,267	26	171	4
2009	1,154	25	121	3

[SEE Figure 15: Yearly Admissions by Category: FY 1999 - 2009 -- page 27; and

Figure 16: Yearly Releases by Category: FY 1999- 2009 -- page 28; and

Table 4: Total Admission and Release Events: FY 2007- FY 2009 -- page 29; and

Table 5: Total Admission and Release Events: FY 1999 - FY 2009 -- page 31]

Admissions by Court Actions

- The distribution of the FY 2009 court commitments by type of crime indicates that the most serious active offense for the current incarceration was a "person" offense in 49% of the cases and was a "non-person" offense in 51% of the cases. Drug offenses and property offenses comprised the bulk of the non-person offenses.
- The distribution of the FY 2009 court commitments by county indicates that six counties (Johnson, Reno, Saline, Sedgwick, Shawnee, and Wyandotte) collectively account for 57% of the total.
- In FY 2009 there were 61 admissions of offenders under age eighteen at the time of offense, up somewhat from FY 2008 but down markedly from a decade ago.

[SEE Table 6: FY 2009 Court Commitments by Type of Crime and Offense Grouping -- page 33; and

Figure 17: FY 2009 Court Commitments by County -- page 34; and

Table 7: Number of Admissions of Offenders Under Age Eighteen at the Time of Offense, by Type of Offense: FY 1999 - FY 2009-- page 35]

Rate of Parole

The information presented on rate of parole pertain to the relatively few offenders who are still subject to release via the Kansas Parole Board. The information presented here reflects Kansas Parole Board decisions only and not actual parole exits from correctional facilities. The length of the period of time between the decision to parole and the actual release varies among cases.

- The rate of parole for FY 2009 was 36.7% - up from 31.9% in FY 2008. It should be noted that with the application of the provisions of the Kansas Sentencing Guidelines Act, which began in FY 1994, most offenders are released to post-incarceration supervision rather than being considered for parole through the parole hearing process. Also, the data on parole decisions, as in past years, is limited to regular parole hearing decisions (whether by regular hearing, special minute, etc.) that were recorded by KPB staff. Excluded are decisions from parole violation hearings (outcomes of which include a new regular hearing date being set, a future release date being set, or the offender being "re-paroled").

[SEE Table 8: Kansas Parole Board Decisions by Type of Decision (FY 1999 - FY 2009 -- page 36]

Releases to Post-incarceration Supervision

- As in previous years, the releases to post-incarceration supervision occurring in FY 2009 were concentrated in a few counties/states:
 - Four counties (Johnson, Sedgwick, Shawnee, and Wyandotte) collectively account for 63.4% of the total number of in-state releases. Sedgwick County alone received 1,181 (33.3%) of the statewide total.
 - Three states (Missouri, Oklahoma, and Texas) collectively account for nearly half (45.8%) of the total number of out-of-state releases. Missouri alone received 137 (32%).

[SEE Figures 18a and 18b: Kansas Offenders Released to Post-incarceration Supervision During FY 2009 by County or State to Which Released -- page 37]

Offender Recidivism

The rate of offender recidivism has been operationally defined by the Department as the rate of return to Kansas prisons by offenders released to post-incarceration supervision. In deriving the data on this measure each offender is tracked individually for the specified length of the follow-up period. Separate rates are calculated for those returning with new

sentences and those returning with no new sentences. A graphic summary of the return rates for three yearly cohorts of releasees (FY 2004 FY 2005, and FY 2006) is presented in Figure 19. Table 9 contains more detailed information regarding the return rates for the release cohorts for these years and other years (Fiscal Years 2001 – 2008).

- "Overall return rate" (combined returns via new sentence, no new sentence, new commitment after discharge, plus those for whom parole warrants were in effect as of the end of the follow-up period) for the release cohorts was as follows:

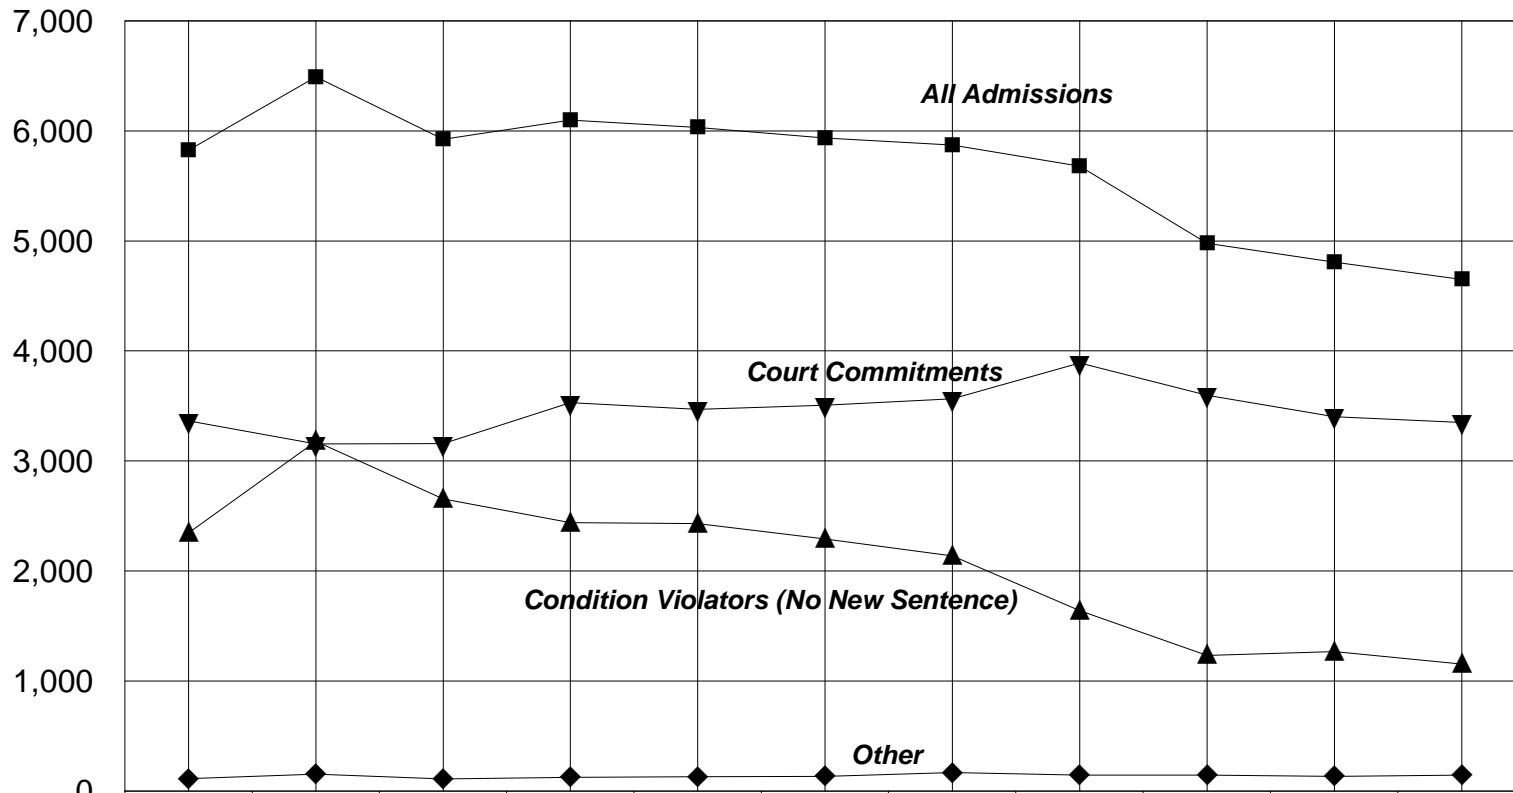

Follow-up Period (years after release)	Range of Return Rates
One	34.0% – 56.8%
Two	41.1% – 62.8%
Three	47.3% – 65.2%
Four	55.4% – 67.4%
Five	63.4% – 68.4%

- Note that most failures occur in the first three years after release, and by the end of two years, half or more of those released have returned to Kansas correctional facilities, or have active parole warrants.

[SEE Figure 19: *Return Rate of Offenders Released (FY 2004, FY 2005, and FY 2006)* -- page 39; and

Table 9: *Return Rate of Offenders Released from KDOC Facilities During FY 2001 - FY 2008; By Type of Readmission and Length of Follow-up Period* -- Page 40]

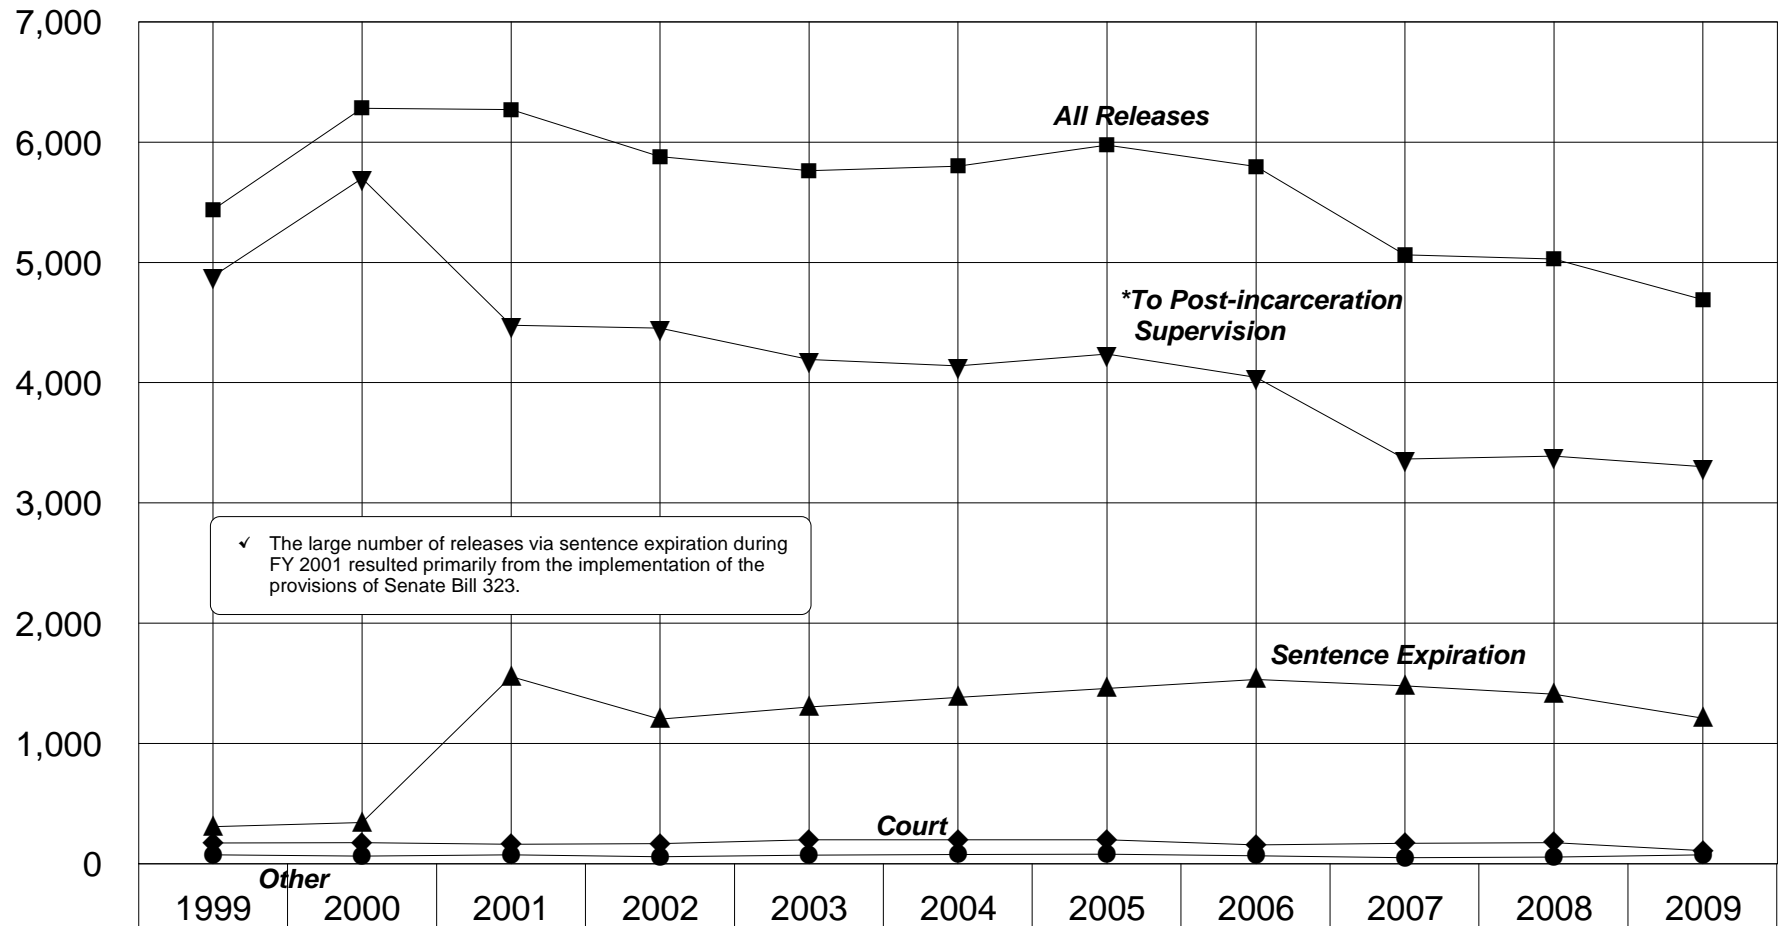

Figure 15
Yearly Admissions by Category:
Fiscal Years 1999 - 2009

Note. The category "Condition Violators (No New Sentence)" includes a significant number of cases in which the offender was officially returned with no new sentence, but actually had been convicted of a new felony offense, the date of offense for which was before the return to prison. Documentation for the new sentence did not become available until after the offender was admitted.

* Information pertains to each offender's most serious active offense for the current incarceration. Included are attempt, conspiracy, and solicitation to commit the offense.

** Any "aggravated" version of an offense is included in the offense grouping.

Figure 17

FY 2009 Court Commitments by County*

Kansas

*The figure for each county reflects court commitments as defined in Table 4. Statewide, there were 3,350 such admissions (including 88 for which information on the county of commitment was not available). Six counties (those projected on the map—Johnson, Reno, Saline, Shawnee, Sedgwick, Wyandotte) collectively accounted for over half (57%) of the total. The county identified is the one associated with the offender's most serious active offense for the current incarceration.

* Source of information: Kansas Department of Corrections computer program "KPBTBL" (KPB decisions that occurred during the period specified). The number of paroles and passes reflect all such KPB decisions pertaining to regular parole hearings during the period (from version 1 of "KPBTBL" - "All KPB Decisions"). The number of continuances is the number of offenders whose latest KPB decision of the period was "continued" (from version 2 of "KPBTBL" - "Most Recent KPB Decision").

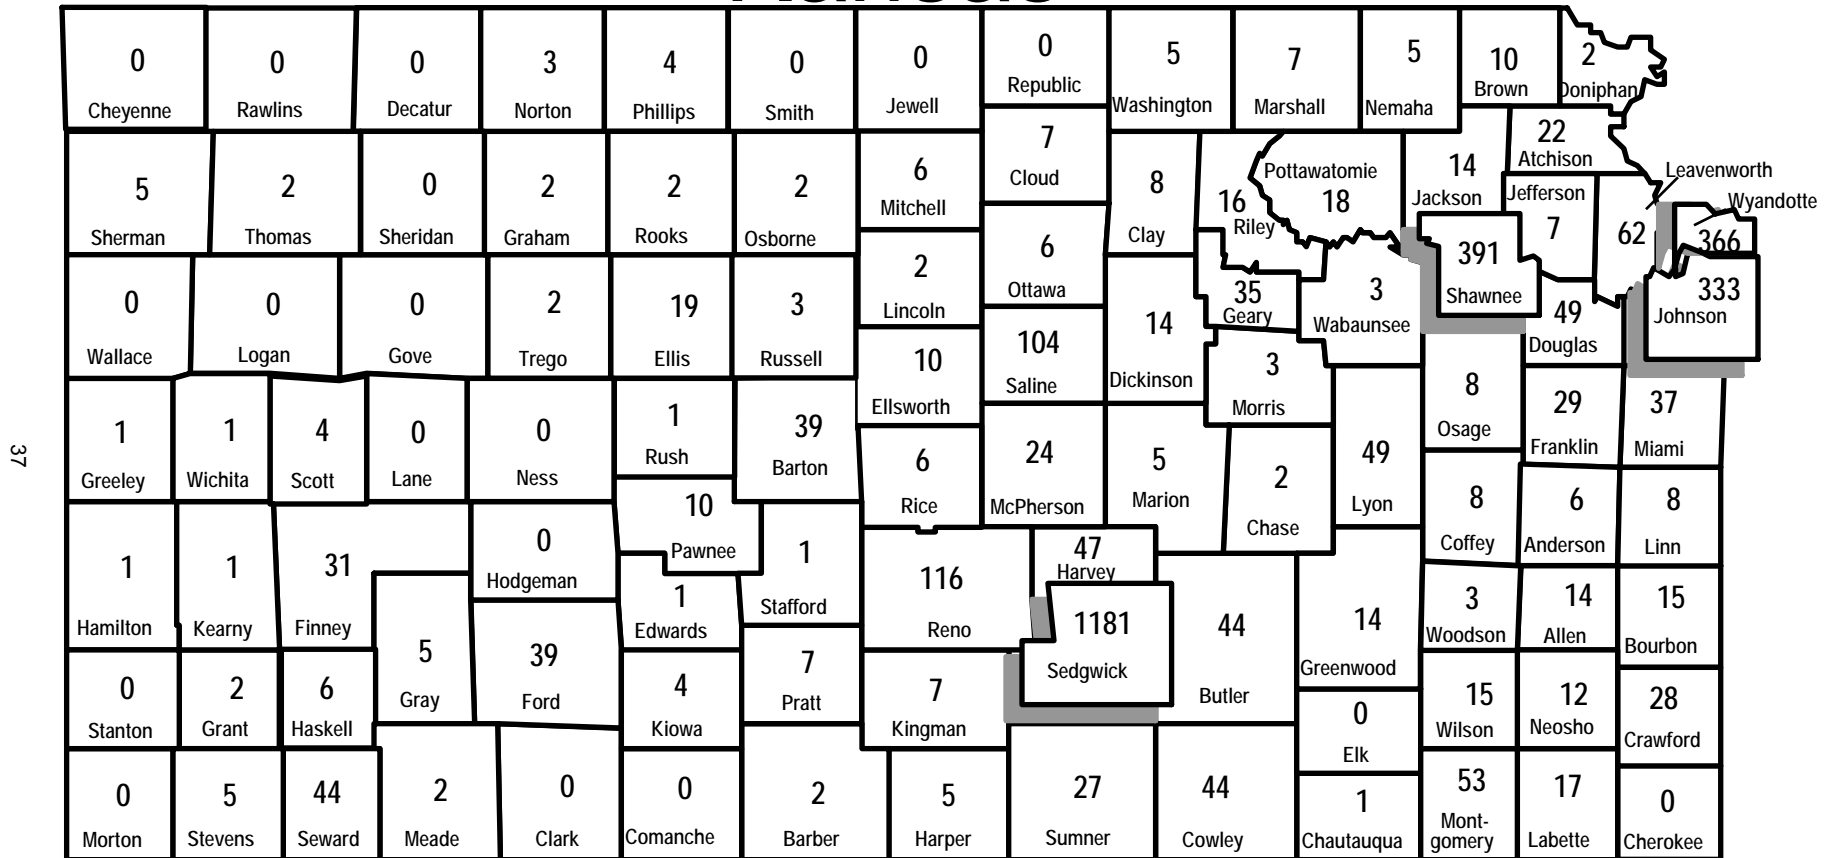

The tabled information reflects KPB decisions only and not actual parole exits from correctional facilities. The data include all regular parole hearing decisions (whether by regular hearing, special minute, etc.) that were entered into the KDOC computer by KPB staff. Excluded are decisions from parole violation hearings (outcomes of which include a new regular hearing date being set, a future release date being set, or the offender being "reparoled").

** Explanation of the types of KPB decisions rendered: "Parole" - parole granted; "Pass" - parole denied, a date is set for offender to be heard again (or passed to conditional release date); "Continue" - decision pending, a final decision will be made after further deliberation.

Figure 18 a

Kansas Offenders Released to Post-Incarceration Supervision During Fiscal Year 2009, by County or State to Which Released Part 1: Release to Post-Incarceration Supervision in Kansas*

Kansas

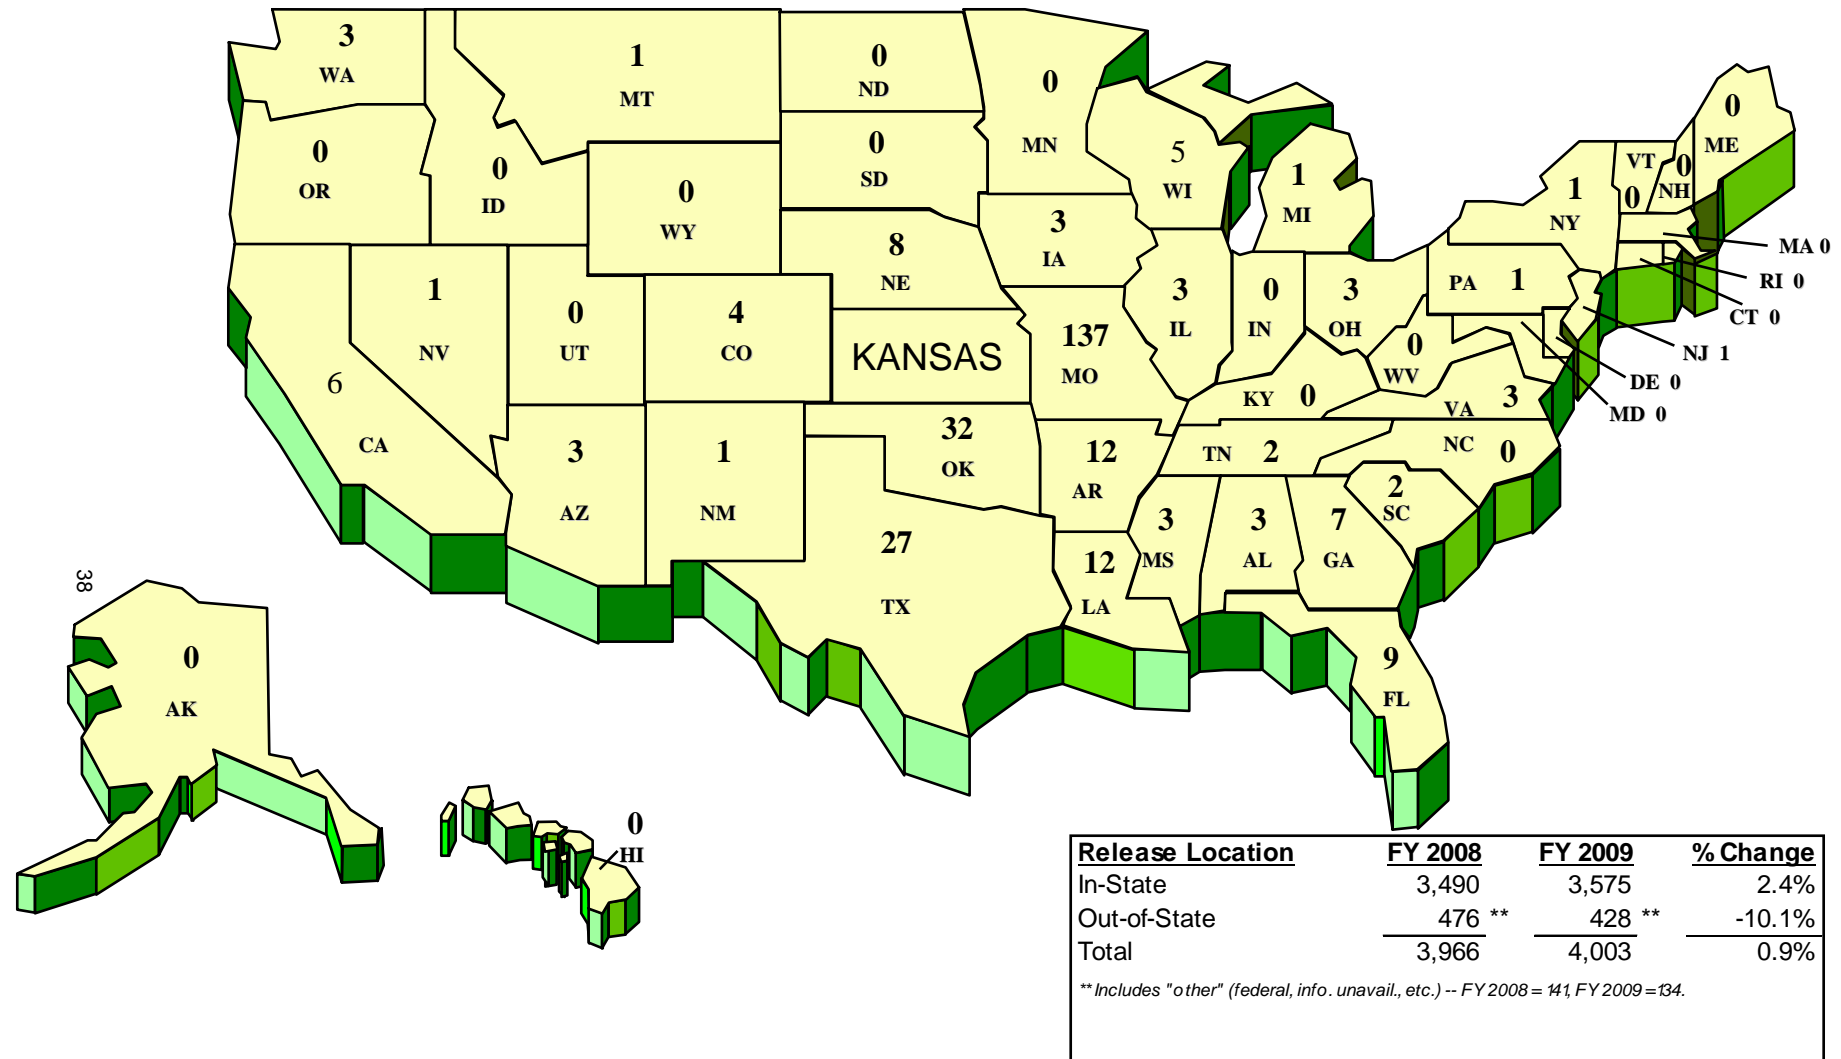

Note. Four counties, those projected on the map, accounted for 63.4% of the statewide total.

Fig18a-SP2009.ppt

* Figures include any multiple releases of an individual offender during the period. The types of releases include: Parole, reparole, parole to detainee, parole of returned probationer, supervised conditional release, and release to post-incarceration supervision via the provisions of the Kansas Sentencing Guidelines Act of July 1, 1993. The totals are larger than corresponding figures in Tables 4 and 5. [Primarily, this is because the information in Figure 18 (a and b) includes several hundred additional cases in which offenders convicted per K.S.A. 08-1567 (4th DUI conviction) actually enter post-release supervision without having first been confined in prison.]

Figure 18 b

Part 2: Release to Post-Incarceration Supervision Out-of-State*

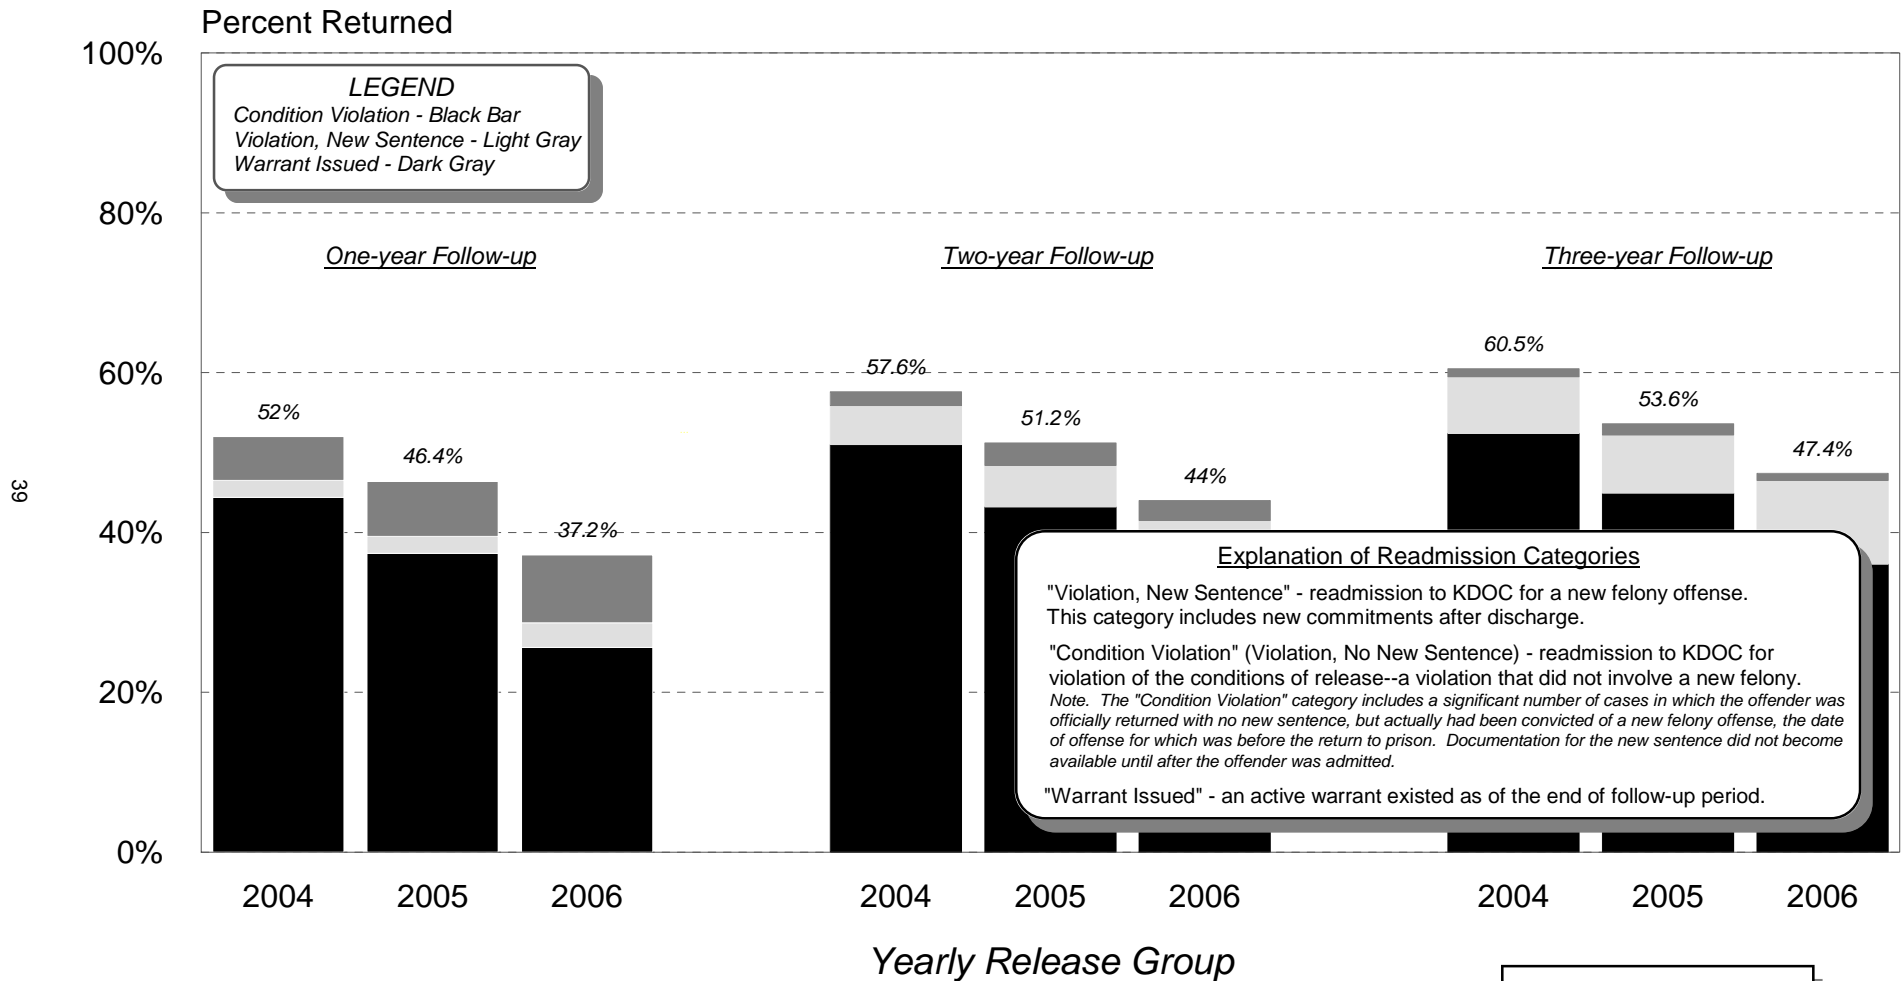

*Figures include any multiple releases of an individual offender during the period. The types of releases include: Parole, reparole, parole to detainer, parole of returned probationer, supervised conditional release, and release to post-incarceration supervision via the provisions of the Kansas Sentencing Guidelines Act of July 1, 1993. The totals are larger than corresponding figures in Tables 4 and 5. [Primarily, this is because the information in Figure 18 (a and b) includes several hundred additional cases in which offenders convicted per K.S.A. 08-1567 (4th DUI conviction) actually enter post-release supervision without having first been confined in prison.]

Violation, No New Sentence	2,207	58.0%	2,081	58.5%	1,906	55.2%	1,800	53.3%								
New Commitment (After Discharge)	250	6.6%	234	6.6%	197	5.7%	228	6.7%								
Active Warrant (End of Period)	19	0.5%	16	0.5%	13	0.4%	14	0.4%								
Total (All Cases)	3,805	100.0%	3,555	100.0%	3,450	100.0%	3,380	100.0%								

Note. The category "Violation, No New Sentence" includes a significant number of cases in which the offender was officially returned with no new sentence, but actually had been convicted of a new felony offense, the date of offense for which was before the return to prison. Documentation for the new sentence did not become available until after the offender was admitted.

*See additional footnotes next page.

Table 9 (continued)

**Return Rate of Offenders Released From KDOC Facilities During FY 2001-2008
by Type of Readmission and Length of Follow-up Period***

Footnotes

* The release population includes all offenders released to post-incarceration supervision (via the Kansas Sentencing Guidelines Act of July 1, 1993) or by way of parole or conditional release during the fiscal year specified. Excluded are releases to detainees. The follow-up is applied individually for each inmate (release date plus the specified number of years in the follow-up period).

Explanation of row headings:

No Return to KDOC = no readmission to KDOC facilities during the follow-up period;

Violation, New Sentence = readmission to KDOC for a new felony offense;

Violation, No New Sentence = "condition violation" - readmission to KDOC for violation of the conditions of release that did not involve a new felony sentence;

New Commitment (After Discharge) = new admission to KDOC (after discharge from sentence obligation, but before the end of the follow-up period);

Active Warrant (End of Period) = offender had an active warrant as of the end of the follow-up period

Blank cells in table: Information not yet available (end date of follow-up period has not yet passed).

In some instances it is possible for the number of "No Returns" during the year to be greater than that of a preceding year. Such instances arise in cases where the offenders are on abscond status for a long period of time (counted in "Active Warrant" group), but later are reinstated on supervision in good standing and then discharged. When such reinstatements occur, the affected offenders move from the absconder group to the "No Return" group for the latest year.

NOTE: Each percentage total is given as 100 even though the sums may vary slightly due to rounding.

Kansas Department of Corrections

FY 2009 STATISTICAL PROFILE

Section IV

Inmate Population Profile:

June 30, 2009

SECTION IV

June 30, 2009: Profile of the Inmate Population

This section provides a description of selected characteristics of the inmate population confined within Kansas correctional facilities on June 30, 2009, the last day of FY 2009. The focus of this profile information is on the demographic attributes and social backgrounds of the

offenders, the nature of the offenses for which incarcerated, the sentences imposed, and the criminal histories of the offenders. The inmate population was composed of 8,021 males and 589 females, for a total of 8,610.

Characteristics of the Inmate Population

- The list below summarizes some of the basic characteristics of the inmate population on June 30, 2009. Each of the following characteristics was observed in at least half the inmates upon admission to the correctional system (or, as in the case of "age" and "length of current confinement," the status as of June 30, 2009):
 - Sex – Male (93.2%)
 - Racial/ethnic Group – White (with large non-white minority)
 - Age – Average age 36.6 years.
 - Formal Education (at admission) – High school graduate, G.E.D., or more (58%)
(In the years 1992 and before the majority had less than high school or G.E.D.)
 - Formal Vocational Training – None (71%)
 - Type of Admission – New court commitment, including probation violators (82%)
 - Type of Offense (overall most serious offense) – Person crime (73%)
 - Duration of Confinement To-date (through 6-30-2009) – 24 months or less (50%)

- There is considerable difference among the correctional facilities with regard to the demographic and criminal history characteristics of the inmate population housed. To a great extent this reflects the assignment of housing according to the security needs of the inmates, as well as their needs for particular correctional programs and services.
- The distribution of the inmate population by custody classification was as follows on June 30, 2009:

Inmate Custody Classification

Special Management	8.3%
Maximum	11.1%
Medium (high)	17.2%
Medium (low)	29.0%
Minimum	30.7%
Unclassified	3.6%
Total	100%

- Detailed information on the basic demographics of the inmate population is presented in Table 12 (current age group, gender, racial group, and Hispanic/Non-Hispanic).

[SEE Figure 20: Inmate Population, by Housing Facility: June 30, 2009 -- page 48, and

Table 10: Summary of Inmate Characteristics: June 30, 2009 Population -- page 49; and

Table 11: Inmate Characteristics: Comparison of the June 30, 2008 and June 30, 2009 Populations -- page 51; and

Table 12: Demographics: June 30, 2009 Inmate Population; and -- page 53

Inmate Employment Status and Program Assignments

- On June 30, 2009, 6,066 (70.5%) of the total inmate population of 8,610 had primary work, program (including treatment programs), academic, or vocational assignments (Table 13, Part 2). For most inmates, the primary assignment was full-time, meaning that a single work or program assignment occupies the inmate for more than half the workday, usually for 6.5 hours or more. The 159 inmates counted in the "Treatment Program" column are those whose primary assignment (payroll category) is "treatment." Many in this group are in treatment half-time and also work at a job. Thus, the total in this category is not meant to be construed as the total involved in treatment, since many additional inmates participate in these and other programs on a part-time basis.

Note that the 111 inmates in contract placement (Larned State Hospital) are counted and considered to have primary work/program assignments.

- The proportion with primary work/program assignments (70.5%) was down somewhat from FY 2008 and other recent years.
- Of the 2,544 inmates without primary assignments (Table 13, Part 2, the three columns under "No Primary Assign" (except for the 111 offenders assigned to non-KDOC facilities):
 - 1,265 had no assignment because they were in some type of segregation, orientation, evaluation, medical "lay-in", or did not yet have a payroll record.
 - 1,279 were not assigned because they were in transition between assignments, or because an assignment was not available on the specified date ("No Work Available" category), or because they were unwilling or temporarily unable to be assigned ("Cause" category).
- The most common institutional assignments were of the following types: institutional support, maintenance, utility work detail, Kansas Correctional Industries, vocational or academic education, and evaluation status. Additionally, a large number of inmates housed at the smaller facilities were assigned to non-institutional work programs.

[SEE Table 13: Inmate Payroll Work/Program Assignments: June 30, 2009 -- page 54]

Comparison of Inmate Population by Gender

- As of June 30, 2009, the inmate population was 93.2% male and 6.8% female.
 - The women in the inmate population numbered 589, down from 601 on June 30, 2008. During FY 2009, the male inmate population decreased slightly to 8,021 from 8,052.
- The male ADP is 4% greater than 10 years ago (FY 1999), while the female ADP is 13% greater.
- As in past years, differences have been noted between the female and male inmates on almost all the characteristics compared. Proportionately speaking, in comparison to the male population the female population:
 - contained more inmates in the middle to older age groups
 - had been committed for less severe offenses
 - had shorter average duration of current confinement
 - had less extensive criminal histories

[SEE Figure 21: Female Inmate Population and Average Daily Population -- page 57;

Figure 22: Change in Average Daily Population: Male and Female Inmates, FY 1999 - FY 2009-- page 58; and

Table 14: Comparison of the Characteristics of Male and Female Inmates: June 30, 2009 Population -- page 59]

Characteristics of the New Admissions Population

Although the yearly turnover rate is relatively high among the offenders in the inmate population, at any point in time there is a large proportion of the group that has been counted in the yearly population for a number of years. The characteristics of newly admitted offenders have been examined in order to better assess any trends toward change in the composition of the inmate population. Included as new

admissions are new court commitments and probation violators. Many offenders in this group are also members of the end-of-year inmate population since they were still on hand as of June 30, 2009. Note that the new admissions were not necessarily first-time offenders – some had been incarcerated previously in other states or had served Kansas sentences from which they had been discharged.

-
- Compared to the June 30, 2008 inmate population, the FY 2009 new admissions population contained proportionately:
 - more offenders in the younger age groups
 - more women
 - more offenders with less serious offenses

To some extent the differences noted are due to the type of offense and sentence length. The offenders with more serious offenses, extensive criminal histories, and longer sentences tend to accumulate in the inmate population. Thus, the population on hand contains proportionately more offenders with these and related characteristics than does the population of new incoming offenders.

[SEE Table 15: Characteristics of the New Admissions Population: Comparison of FY 1999 - FY 2009 -- page 61]

Criminal Offenses and Sentence Structures

- Distribution of the June 30, 2009 inmate population by type of crime (overall most serious offense) was as follows:

Type of Offense	Number	% of Total
Person Offenses:		
Sex Offenses	1,924	22.4%
Other Person Offenses	4,391	51.0%
Property Offenses	467	5.4%
Drug Offenses	1,662	19.3%
Other Non-person Offenses	161	1.9%
Total	8,605	100.0%
Information Unavailable	5	----
Grand Total	8,610	----

- For purposes of describing sentence structure, the inmate population has been separated into three groups—those with only indeterminate sentencing (offenses committed prior to the effective date of the Kansas Sentencing Guidelines Act of July 1, 1993), those with only determinate sentences, and those for whom both determinate and indeterminate sentences are involved. The last group includes primarily two types of offenders: Those with active sentences for crimes committed before and after July 1, 1993; and those with pre-July 1, 1993 crimes only who were eligible for sentence conversion under the Sentencing Guidelines Act.

The distribution of the three groups by sentence length is tabled below. Note that direct comparisons regarding the amount of time to serve cannot be made from this information since potential good time to be deducted from the sentence differs greatly between the two groups – a maximum of about 50% for most in the indeterminate only group versus a 15% maximum (in some cases 20%) for those with only determinate sentences.

Distribution by Sentence Length: June 30, 2009 Inmate Population

	% of Total		
Months	*Indeterminate Only (Controlling Minimum Sentence) n = 1,203	Determinate Only (Total Months to Serve) n =6,983	**"Mixed" Sentencing (Total months to Serve) n=398
12 or fewer	0.0	3.6	0.8
13 – 24	0.1	11.0	2.0
25 – 36	0.2	15.0	1.8
37 – 48	0.7	10.6	1.0
49 – 60	4.6	10.8	1.0
61+	94.4	49.0	93.4
Total	100.0	100.0	100.0

*Note that the controlling minimum sentence determines when an offender will be eligible for release by parole. For most offenders in this group, the time to parole eligibility is at least 50% of the minimum term. Offenders who are denied parole serve past the eligibility date.

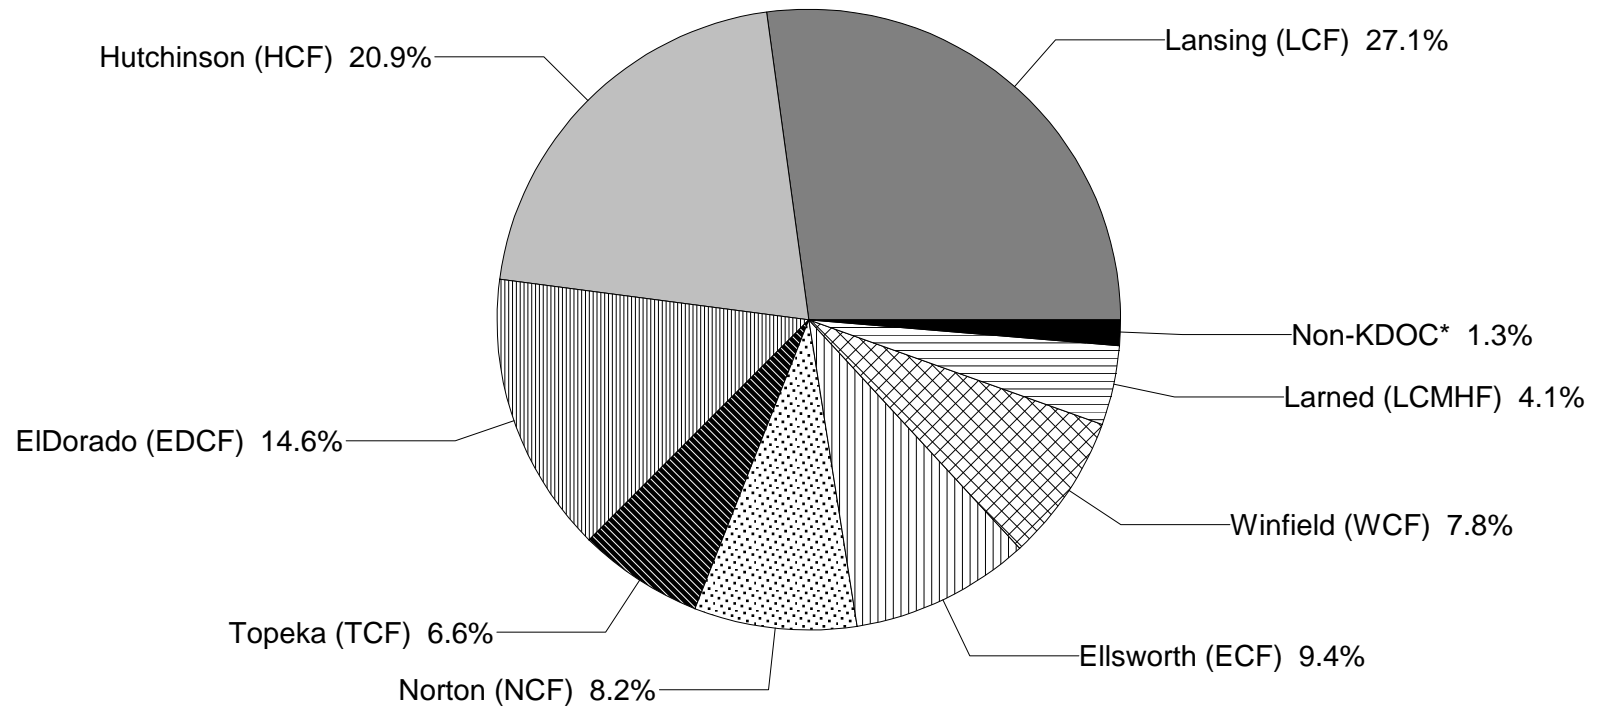

**Includes those with sentence structures that involve both determinate and indeterminate sentencing. This group includes a substantial number of offenders committed as condition violators whose indeterminate sentences were converted to determinate.

[SEE Table 16: June 30, 2009 Inmate Population by Overall Most Serious Offense -- page 63; and

Table 17: Length of Sentences: June 30, 2009 Inmate Population -- page 66]

Summary of Inmate Characteristics: June 30, 2009 Population*

Facility of Confinement										
** Characteristic	Total	LCF	HCF	EDCF	TCF	NCF	ECF	WCF	LCMHF	****Contract Placement
Number of Previous Felony Convictions										
Info. Unavail.	8,610									
Total	8,610									
Number of Previous Felony Incarcerations										
Info. Unavail.	8,610									
Total	8,610									
<p>The process which had been used for obtaining the information on "Previous Felony Convictions" and "Previous Felony Incarcerations" was converted to a "computer-generated" system based on historical information in the computerized offender database. Thus, such information is currently incomplete for the inmate population and available only on offenders admitted since the conversion took place in February 2001.] Note that Table 11 contains related information on "Criminal History Category," which reflects an offender's cumulative history in terms of previous adult convictions and/or juvenile adjudications.</p>										

* The population includes, in addition to inmates actually housed in correctional facilities on June 30, 2008, all offenders in the following physical locations: state hospital, contract jail placement, Labette CCC (closed in FY 2009), out for medical care, and out on furlough. Excluded from the population are offenders out for court appearances, inmates serving Kansas sentences while housed in out-of-state facilities under compact agreement, inmates serving in absentia (inmates housed in other jurisdictions while serving Kansas sentences concurrently with sentences of other jurisdictions), escapees, offenders confined in local detention facilities, and all offenders on parole or probation status.

** All characteristics reflect status on June 30, 2009 (or time calculated from that date) except "Education Level" which is as reported upon admission. The total number of inmates for which information was available varies with the type of characteristic assessed.

*** Not included as a separate racial category is "Hispanic" of which there were 853 inmates (833 of whom were in the "White" category, 12 in "Black", and the remaining 8 in other racial groups).

**** "Contract Placement" includes Larned State Hospital, Contract Jail Placement (and Labette County Conservation Camp, which was closed in FY 2009).

Note: See Preface, pages vi and vii, for list of facility abbreviations.

* All characteristics reflect status on June 30 of the specified year (or time calculated from that date) except "Education Level" which is as reported upon admission. The total number of inmates for which information was available varies with the type of characteristic assessed.

** Not included as a separate racial category is "Hispanic" of which there were 853 inmates (833 of whom were in the "White" category, 12 in "Black", and the remaining 8 in other racial groups) as June 30, 2009.

*** Period from most recent admission to June 30 of the specified year.

**** Figures represent the number of inmates in the population on the date specified whose most recent entry into the Department of Corrections was of the specified type.

Note: Each percentage total is given as 100 even though the sum may vary slightly due to rounding.

* Information reflects the level at which an inmate is paid (as recorded in the computerized offender payroll record). It does not necessarily indicate any type of job performance level or job skill level. In some instances inmates can be technically not employed (e.g., treatment programs, some types of "lay-in" status), but still be paid. Source of information for Part 1: PGM-ISR0396P Inmate Work Assignment Chart [except for Correctional Industries data which came from KCI's report "Traditional and Private Industry Inmate Work Assignments FY 2009"].

** Information reflects the type of work or program assignment (as recorded in the computerized offender payroll record). Source of information for Part 2: Computerized report "PGM-ISR0396P."

*** Indicates treatment program participants without a separate primary work assignment (e.g., sex offender treatment, substance abuse treatment, including therapeutic community).

**** "Eval." = Evaluation status. Reasons for "Idle" status: Lay-in for "cause"; lay-in because "No Work Available" (or awaiting re-assignment); lay-in for medical reasons. "Residual (Other)" includes some of the inmates in segregation, as well as those for whom payroll records are not available. See Part 3 of this table for more information on "lay-in" and segregation.

* All characteristics reflect status on June 30 of the specified year (or time calculated from that date) except "Education Level," which is as reported upon admission. The total number of inmates for which information was available varies with the type of characteristic assessed.

** Not included as a separate racial category is "Hispanic" of which there were 853 inmates, 793 males and 60 females. Of the 853, 833 were in the "White" category (777 m, 56 f), 12 in "Black" (9 m, 3 f), and the remaining 8 in other racial groups (7 m, 1 f).

*** Period from most recent admission to June 30 of the specified year.

Note: Each percentage total is given as 100 even though the sum may vary slightly due to rounding.

Information Unavailable 26						
Grand Total	8,610					

* The controlling sentence is pertinent to those with indeterminate sentencing and represents the range, in years, determined by the longest minimum and the longest maximum term to be served. The controlling minimum is the indicator for the parole eligibility date. The controlling maximum is used to project the conditional release date (the date of the maximum term less the statutory earned good time) which indicates completion of the sentence obligation.

** The information pertains to the 7,381 inmates in the population who had only determinate sentences (those sentenced under the Kansas Sentencing Guidelines Act, which was effective 7-1-1993), or had "mixed" sentencing [with both determinate and indeterminate sentencing involved, or "Life-Off Grid" sentencing involved].

*** Inmates with "off-grid" life sentences only are included in the first part of the table in the "Life" category.

Note. Figures reflect sentences without application of good time credits.

Kansas Department of Corrections

FY 2009 STATISTICAL PROFILE

Section V

**Post-Incarceration
Offender Population:**

June 30, 2009

SECTION V

June 30, 2009 Post-incarceration Offender Population

This section provides a brief description of the population of offenders in the correctional system who were on post-incarceration status as of June 30, 2009. The in-state caseload consists of Kansas offenders released to post-incarceration supervision in Kansas, as well as out-of-

state parolees and probationers received by Kansas for supervision under interstate compact. There are no Kansas probationers included in the caseload since the supervision of this group has been a function of the district courts since July 1, 1979.

Population Under Management of Parole Services

- The year-end in-state supervision population (the number of Kansas offenders supervised in Kansas and compact cases supervised in Kansas) peaked in FY 1994 at 6,083. As shown in Figure 23, there was a very large decrease during FY 2001 (reflecting the impact of Senate Bill 323). Substantial increases have occurred since then, the result being that the current population is only about 5% greater than it was a decade ago.
- The out-of-state supervision population – the number of Kansas offenders supervised in other states under compact, which had been on a downward trend for a number of years, increased to 973 on June 30, 2008, then decreased to 911 on June 30, 2009.
- The number on abscond status decreased sharply in FY 2001. This reflects the impact of Senate Bill 323, as well as the focus on locating and returning absconders. Beginning in FY 1994, the Department formed a "Special Enforcement Unit" to be responsible for locating and arresting offenders who abscond supervision or in some other fashion violate the conditions of release. It is probable that the work of this group contributed significantly to the continuing reduction in the number of absconders.
- The distribution of the in-state supervision population by physical location (county) is presented in Figure 24.

[SEE Figure 23: Components of the End-of-year Offender Population Under Post-incarceration Management: FY 1999- 2009-- page 69

Figure 24: Caseload under Post-release Supervision in Kansas : By County as of June 30, 2009-- page 70

Composition of Post-incarceration Supervision Caseload

- As of June 30, 2009 there was a total in-state caseload of 5,936 offenders under supervision of Kansas parole officers.
 - The total in-state caseload increased by 231 (4.0%) from FY 2008.
 - The year-end average caseload per officer was 57, not much different than in recent years.

[SEE Table 18: Composition of Offender Caseload Managed by Kansas Parole Officers: End-of-year Status FY 1999–FY 2009 -- page 71]

Characteristics of Kansas Offenders Under Post-incarceration Supervision in Kansas

- The basic profile information on the characteristics of the population of Kansas offenders on post-incarceration supervision in Kansas suggests relatively little change in the past several years.
- As indicated in Figure 25, there are substantial differences among the offender populations with regard to type of offense (most serious offense for current incarceration):
- June 30, 2009 Inmate Population and Post-incarceration Population:
 - Of the inmates confined in prison there was 73% with person offenses and only 6% with property offenses, compared to 61% person offenses and 8% property offenses for the population of offenders under post-incarceration supervision.
- FY 2009 Admissions Population and Releases Population:
 - Of the incoming offenders 49% had person offenses and 19% property offenses – compared to 53% person offenses and 14% property offenses for the population of outgoing offenders.

[SEE Table 19: Characteristics of Kansas Offenders Under Post-incarceration Supervision in Kansas: June 30, 2009 -- page 73 and

Figure 25: Comparison of Offender Populations: Distribution by Type of Crime (Most Serious Offense for Current Incarceration) -- page 74]

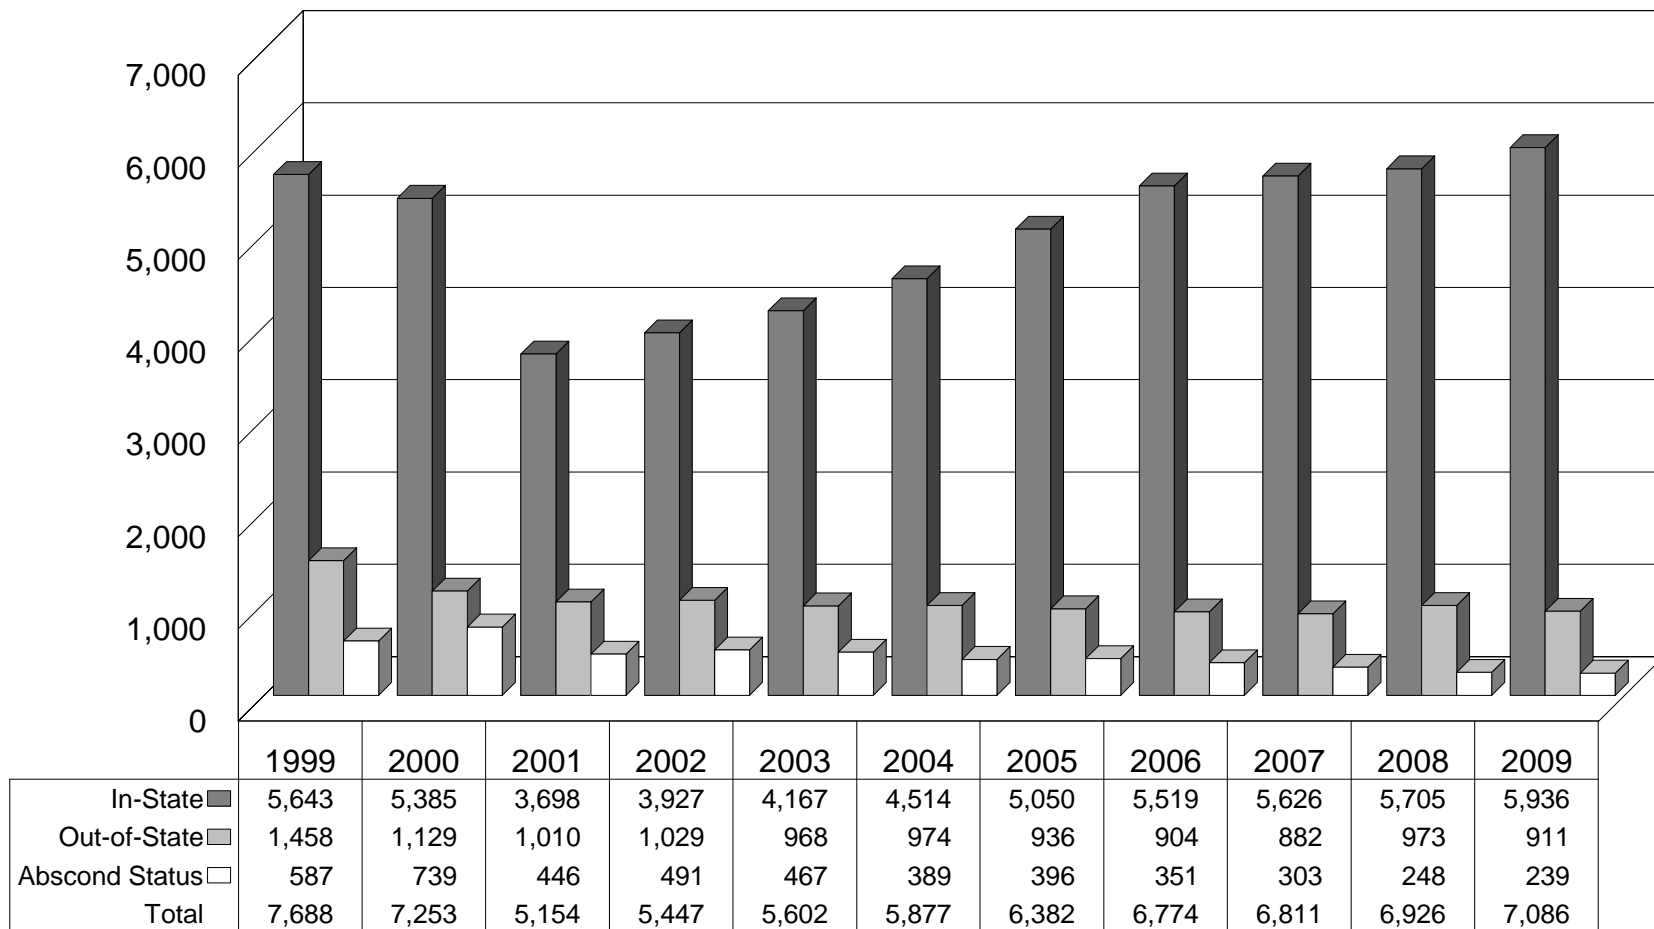

- Within the June 30, 2009 post-incarceration population there was a total of 1,908 out-of-state offenders being supervised in Kansas (529 parole cases and 1,379 probation cases).
- As of June 30, 2009, there was a total of 911 Kansas cases being supervised out-of-state -- nearly half (45.7%) in Missouri, Oklahoma, and Texas collectively.

[SEE Figure 26: Compact Felony Cases Serving Parole or Probation in Kansas on June 30, 2009 by Sending State -- page 75; and

Figure 27: Kansas Cases Under Out-of-state Post-incarceration Supervision by Location: As of June 30, 2009 -- page 76]

* Sources of information: Computerized parole activities report ("PGM-PARREP"). The caseload totals differ slightly from corresponding figures in other parts of this report (e.g., Table 1) because of the differences in the way the computer programs categorize certain types of data.

** Figure represents only those officers who directly supervised clients.

*** Average caseload is based upon the total Kansas caseload, including cases not yet assigned to parole officers.

<i>The information on criminal history (previous convictions and previous incarcerations) is not available for 2001- 2008. Note that Table 11 contains related information (on the June 30, 2009 inmate population) -- "Criminal History Category," which reflects an offender's cumulative history in terms of previous adult convictions and/or juvenile adjudications.</i>		

* Includes conditional releases.

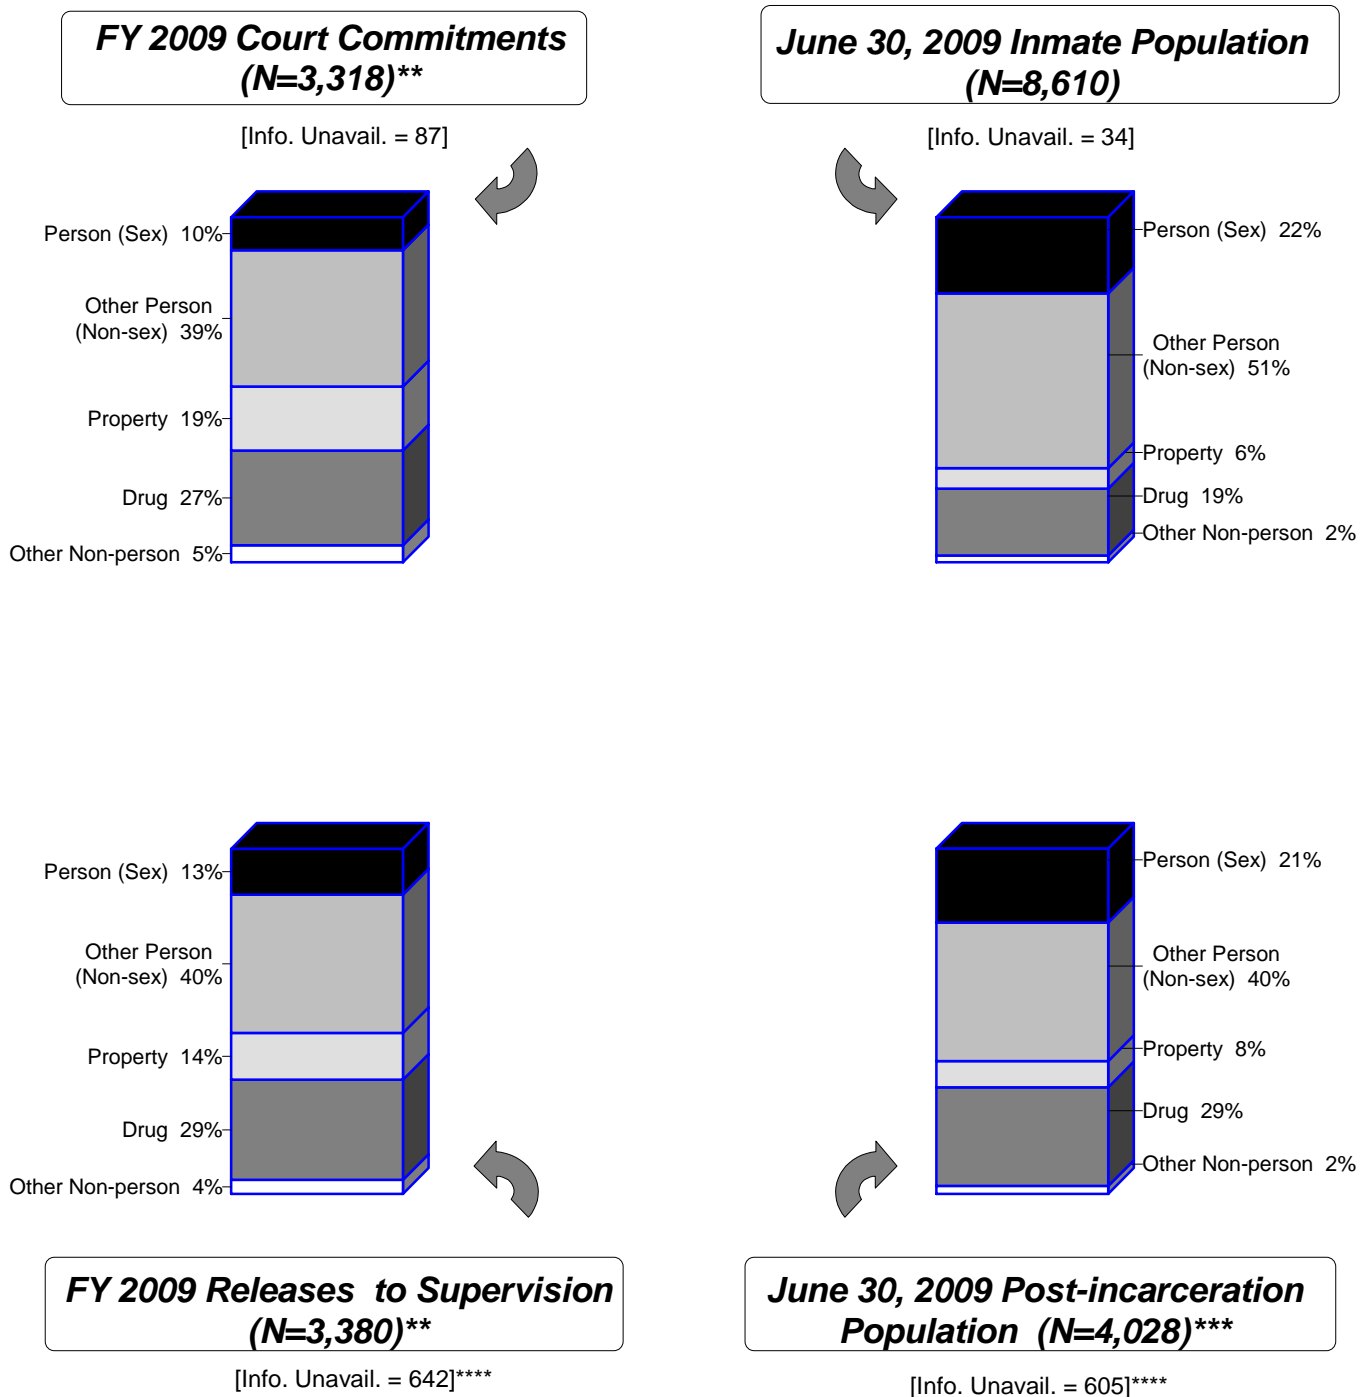

** All characteristics reflect status on June 30 of the specified year. The total number of inmates for which information was available varies with the type of characteristic assessed. The number for which information is unavailable is due primarily to the lack of information on some of the 1,682 out-of-state offenders supervised in Kansas. In previous years the group of out-of-state offenders was excluded entirely from this table.

*** Not included as a separate racial category is "Hispanic," of which there were 421 in the population of 5,777 offenders for whom this information was available. Of the 421, 409 were in the "White" racial category, 9 in "Black," and 3 in the remaining racial categories.

Note: Each percentage total is given as 100 even though the sum may vary slightly due to rounding.

Figure 25

Comparison of Offender Populations: Distribution by Type of Crime (Most Serious Offense for Current Incarceration)*

*Information pertains to the most serious offense for the current incarceration for each offender and includes attempt, conspiracy, and solicitation to commit the offense.

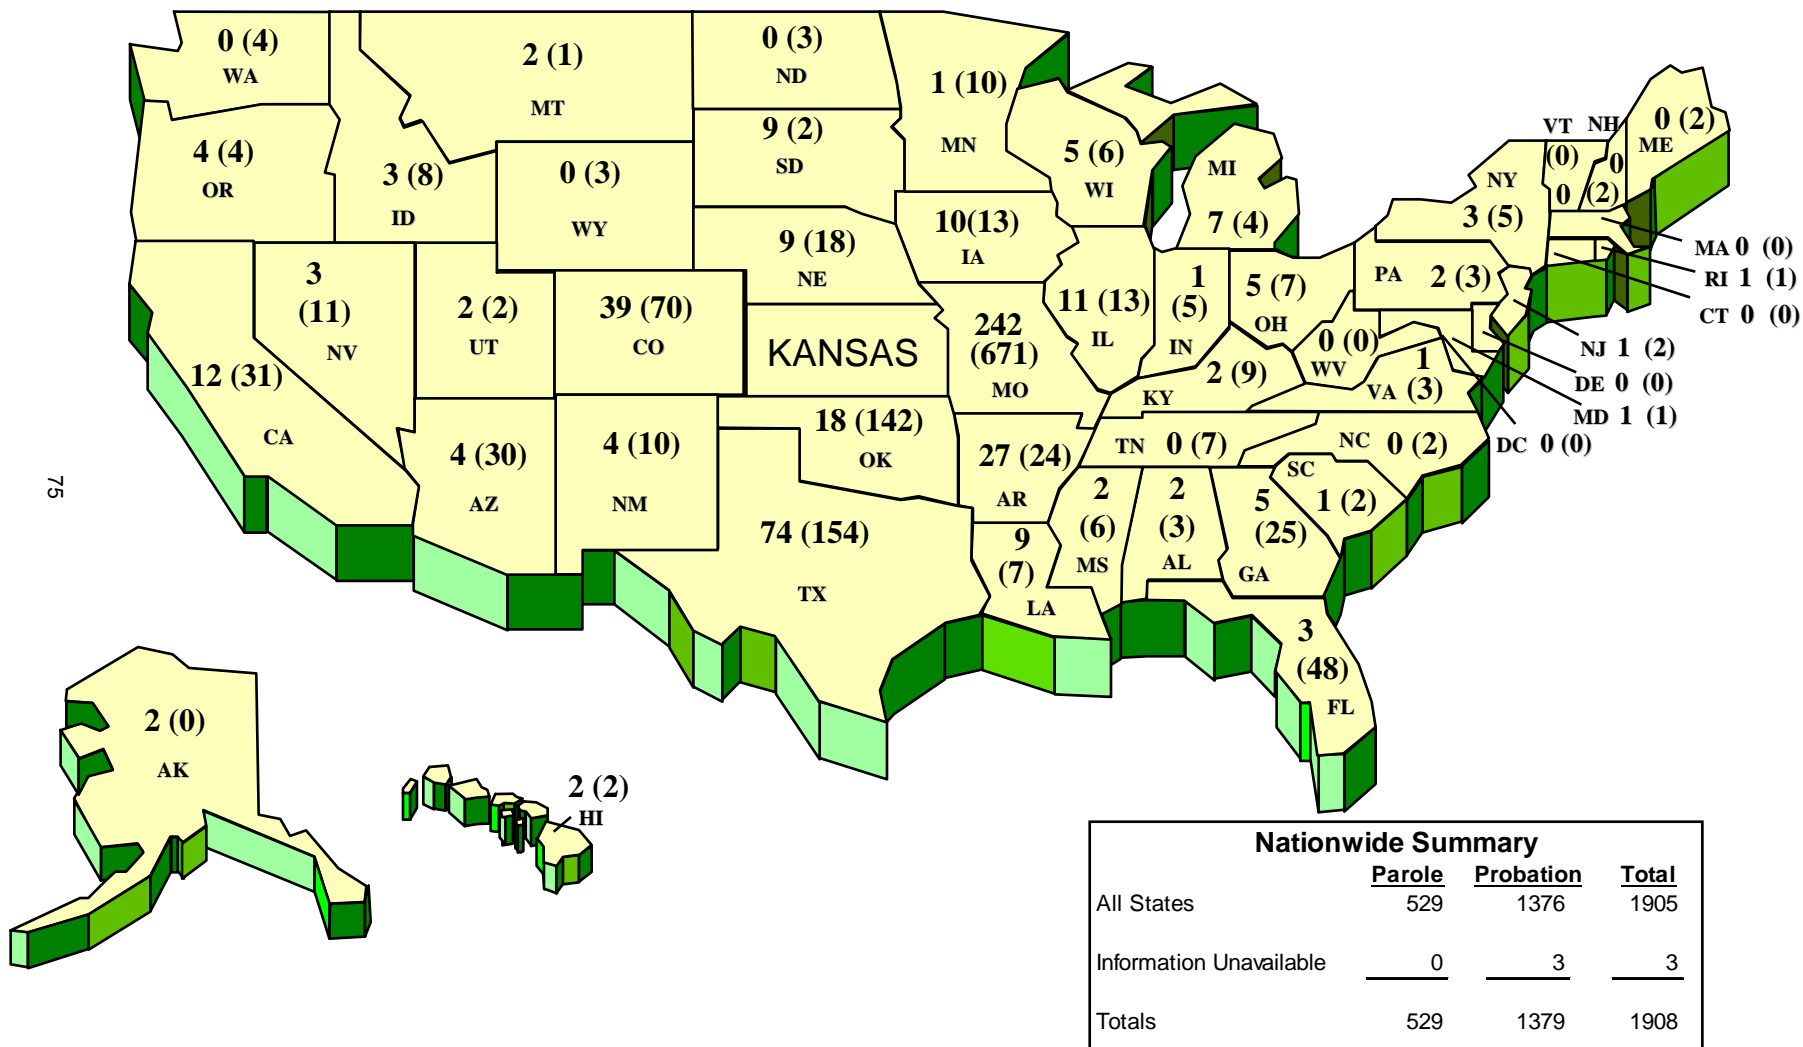

**Earliest admission of the period for each offender; latest release of the period for each offender.

***Kansas offenders supervised in Kansas (excludes 1,908 compact cases supervised in Kansas).

****Most of the cases in "Info. Unavail." category involve offenders who are serving under KSA 08-1467g (4th DUI). These offenders go directly to parole supervision without having first been in prison--hence they had no "most serious offense for current incarceration."

Figure 26

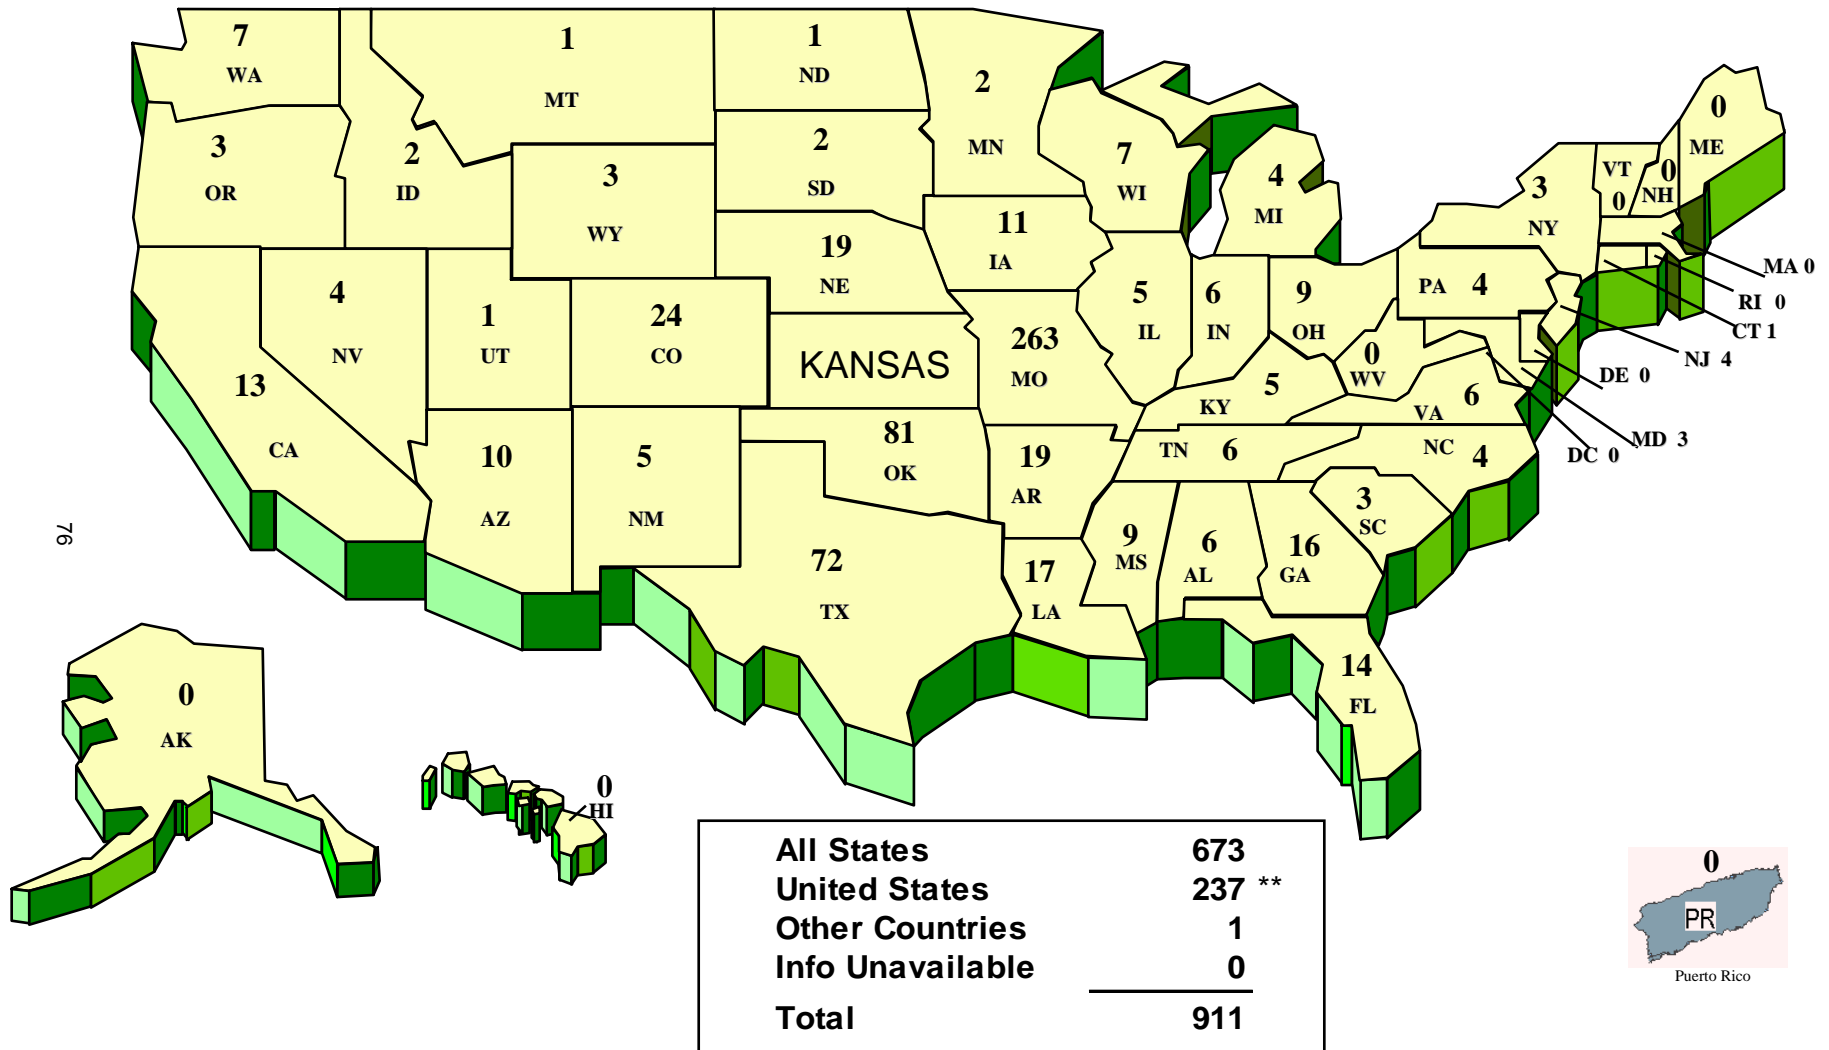

Compact Felony Cases Serving Parole or Probation in Kansas by Sending State: June 30, 2009*

* The first figure for each state indicates the number of compact parole cases; the second figure (in parentheses) indicates the number of compact probation cases.

Figure 27

Kansas Cases Under Out-of-State Post-Incarceration Supervision by Location: June 30, 2009*

* Includes 160 for whom parole warrants have been issued. These offenders are either in a local county jail in another state awaiting return to Kansas, or serving a sentence in another state (with a Kansas detainer in place).

** United States - Indicates parole to federal detainer.
